Generations and Gender Survey Bulgaria Wave 1 & Wave 2 (GGS Bulgaria Wave 1 & Wave 2)

Overview	
Identification	GGS.W1.W2.11
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2004-2007
Countries	Bulgaria

Producers & Sponsors	
Primary Investigator(s)	Bulgarian Academy of Sciences
Funding Agency/ies	Max Plank Insritute for Demographic Research United Nations Population Fund (UNFPA) Ministry of Labor and Social Policy
Other Acknowledgment(s)	National Statistic Institute Max Planck Institute for Demographic Research United Nations Population Fund (UNFPA) Ministry of Labor and Social Policy

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

The sample represented Bulgarian, Turkish and Roma populations in equal proportions (i.e. one third). The 2001 Census was designated as the sampling frame. The target realized sample was estimated at $n = 9,500$ responde. Two stage sampling approach was designed to sample 836 PSUs and 11 individuals per PSU in the second stage. Prior to commencing the selection procedure the sampling frame was sorted according to region, urban and rural areas, municipalities and settlements. Probability proportional to size (PPS) was used to select the PSUs. Random sampling procedure was used for the selection of the individuals from the designated PSUs. The additional sample of $n = 4,100$ individuals was selected to compensate for the nonresponse. The additional sampling was based on the response rates by region and settlement type.

In October 2004 the sampling frame was updated. 863 primary statistical units selected for the sample were updated for any changes in dwellings, households and individuals in these units during the period between the census (March 2001) and the start of the survey (November 2004). Updating revealed impediments, such as restricted access to the buildings, no answer or locked houses. Measures were developed to overcome those difficulties by seeking additional information from neighbours, the house managers or even mayors in more rural areas.

WAVE 2 SAMPLING PROCEDURE

Wave 2 covers the same population that was sampled in 2004, for the first Wave of GGS. The realized sample includes $n = 9,364$ individuals, of whom 72.67% are from Wave 1.

Response Rate

WAVE 1

I = Complete interview: 12858

WAVE 2

I = Complete interview: 9344

The average response rate for the country is 72.7%. The lowest realization of the sample was registered in the capital of Sofia (59.34%) where the mobility of the population is highest. 27.3% of people from the original sample had not been contacted or interviewed.

In general, interviewers didn't manage to contact the same person who participated to the first wave, or people refused to be interviewed.

Weighting

WAVE 1 WEIGHT VARIABLE

Composed post-stratification weight that combines two weights: a) based on age, gender, region (full matrix) and b) based in age, sex, household size (margins).

WAVE 2 WEIGHT VARIABLE: metadata are forthcoming.

Data Collection

Data Collection Dates

Wave 1: start 2004-11-01
 Wave 1: end 2005-01-01
 Wave 2: start 2007-04
 Wave 2: end 2007-06-30

Data Collection Mode

Method: Face-to-Face (personal interview)
 Technique: Paper and pencil (PAPI)

Data Collection Notes

WAVE 1 DATA COLLECTION

- Validation: The questionnaire was re-translated from the national language back to English.
- Pre-test: The pilot study was conducted in June-August 2004 on 300 respondents with 150 in urban and 150 in rural areas.
- Questionnaire localization: Most of the respondents were favourably disposed towards the GGS and were very willing to participate in the Wave 1 as well as expressed the willingness to participate in future waves. Quite some respondents showed an interest in the study results and were thus looking forward to any media releases or other publications. Certain more

reluctant and unsure respondents verified the integrity of the study by checking upon its research orientation, and anonymity. Some main reasons for refusing the participation were: unwillingness to discuss personal life or to be interviewed at all, distrust in surveys, not interested in the topic, and lack of time. Some language barriers were also reported, mainly among the Turkish and Roma populations. Some contacted individuals expressed insufficient confidence in the social studies and hence refused the participation in the study. Some individuals (mostly uneducated and from the Roma community) condition their participation in the study with obtaining of financial assistance, or expected improvement of their life conditions.

WAVE 2 DATA COLLECTION

- Questionnaire localization: The first difficulty was the difficult access to respondents. Then, the main problems encountered are the under-standing of the questions by respondents belonging to non-Bulgarian ethnic groups (Roma and Turks), the volume of the questionnaire and the duration of the interview.

Questionnaires

Structured questionnaire available in Bulgarian.

Supervision

Panel maintenance activities: Special introductory letters have been sent to potential respondents informing them of the importance of the GGS in Bulgaria.

Data Processing & Appraisal

Data Editing

Data entry and system file preparation was done in collaboration with the Max Planck Institute for Demographic Research.

Other Processing

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth;
a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig
a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, ankids, a540.

- Value labels defined: a828, a832, a929*.

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex age abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahtype.

- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.

- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945.

- Variables previously unavailable, now available: aweight (composed post-stratification weight that combines two weights:
a) based on age, gender, region (full matrix) and b) based in age, sex, household size (margins))

- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623,
a624, a625, a626, a627*, a628*, a629*, a631*, a1008, a1008u, a383 (now rounded)

- Changes in the variables labels: a203b_* ("day centre", "kindergarten" "other" were country specific values; now coded into
GGG values ("day centre" to "day care centre", "kindergarten" to "nuresery", "other" to "other")

IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):

- New consolidated variables: a370, a838, a384.

- Changes in the variable/value labels: for all variables now labels for value 7,8,9 are available; a148, a308 and a321(no
correct country-specific value 1101, instead of 1201); a309 (now three values recoded into 3 cs values); a374b (introduced
labels for value 1101); a374b (unused value labels dropped); a380, a514, a5113, a5115(now all values have labels); a1101
(value labels corrected).

- Variables renamed: a203c_1u...`i'u and a204c_1u...`i'u renamed respectively into a203cu_1...`i' and a204cu_1...`i'.

- Variables corrected: a106b, a111, a303b, a306, a374a, a513b, a515, a533b, a535(country-specific values in 4 digits instead
of 5 as in the previous version); a1009 (now country-specific values have 4 digits instead of 3) a129 and a368(all system
missing in the previous version due to an erroneous routing flag, now this is fixed); a414 (wrong value 4 recoded into 7 - "R
does not know")

- Variables with no country-specificities anymore: a112a (value 1101 recoded into 2); a1008 (two cs variables harmonized
into one variable);

FIRST DATASET RELEASED: V. 1.8. (March 2010).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

GGG_Wave2_Bulgaria_V.1.2.

# Cases	9344
# Variable(s)	1383
File Structure	Type: relational Key(s): arid (R identification number)

File Content

GGG WAVE 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave2, version 1.2.

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR , bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: bage, b119, b203*, b510, b530, b626
- Changes in the variable/value labels: bn140* (now with with value labels); b866*, b938*, b1014*, b1018*(corrected variable format); b1007_10, _11 (with variable labels).
- Variables dropped because not part of the GGS Core Questionnaire: bn1302 (renamed into bdwell), bn1303 (renamed into bfloor), bint_sth and bint_stm, bint_pr1 - 5.
- Variables now available: bint_st and bint_pr, bn884*

IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c_*w and b204c_*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint_st and bint_pr.

FIRST DATASET RELEASED: V. 1.0. (November 2012).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership

status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 3027 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

asex: Sex Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6]
Statistics [NW/ W]	[Valid=12858 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Copied from the Household grid (variable ahg4_1).

Value	Label	Cases	Percentage
1	male	5851	45.5%
2	female	7007	54.5%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96]
Statistics [NW/ W]	[Valid=12858 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables ahg3_*). Respondents' households were classified into groups according to the criteria explicated below. 1 "living alone": If the HH grid contains only R (hhsz=1).

File : GGS_Wave1_Bulgaria_V.4.2.

ahhtype: Household type Respondent

2 "single parent":
If HH grid contains R, at least one child (codes 2-6), and no parent.

3 "living with parents":
If HH grid contains R, at least one parent (codes 7, 8), and no child.

4 "single parent living with parents":
If HH grid contains R, at least one child and one parent, but no partner.

5 "couple with no children":
If HH grid contains R, his/her partner (code 1); no child, nor parent.

6 "couple with children"
If HH grid contains R, his/her partner, at least one child, and no parent.

7 "couple with parents"
If HH grid contains R, his/her partner, at least one parent, and no child.

8 "couple with parents and children"
If HH grid contains R, his/her partner, at least one parent and one child.

9 "other types"
HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	1006	7.8%
2	single parent	623	4.8%
3	living with parents	2285	17.8%

numdissol: Total number of partnerships dissolutions

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]
Statistics [NW/ W]	[Valid=12858 /-] [Invalid=0 /-]
Definition	Derived variable

File : GGS_Wave1_Bulgaria_V.4.2.

numdissol: Total number of partnerships dissolutions

Notes The number of non-empty slots in the "Partnership history" grid (a343_); core questionnaire, section 3, page 22.
Note that this variable only refers to resident partners.

Value	Label	Cases	Percentage
0		11803	91.8%
1		974	7.6%
2		75	0.6%
3		5	0.0%
4		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numdivorce: Total number of partnerships ending in divorce

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=12858 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid).
Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		12013	93.4%
1		807	6.3%
2		37	0.3%
3		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

nummarriage: Total number of marriages

Information [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]

Statistics [NW/ W] [Valid=12858 /-] [Invalid=0 /-]

Definition Derived variable

Notes The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

Value	Label	Cases	Percentage
0		3916	30.5%
1		8674	67.5%

3		8	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numpartnerships: Total number of partnerships

Information [Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]

Statistics [NW/ W] [Valid=12858 /-] [Invalid=0 /-]

Definition Derived variable

Notes The total number of partnership dissolutions (see variable numdissol) PLUS the current partnership if one exists (partner is present in the Household grid).
Note that this variable only refers to resident partners, past and present.
Not available for Australia as partnership history grid differs in Australian survey

File : GGS_Wave1_Bulgaria_V.4.2.

numpartnerships: Total number of partnerships

Value	Label	Cases	Percentage
0		2994	23.3%
1		9290	72.3%
2		546	4.2%
3		25	0.2%
4		3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=12858 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise. Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	844	6.6%
2	No	12014	93.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=5008 /-] [Invalid=7850 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (agee.) If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

# a107AgeR: R's age of starting to live in country of interview			
Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*997/998/999]		
Statistics [NW/ W]	[Valid=92 /-] [Invalid=12766 /-] [Mean=17.837 /-] [StdDev=11.552 /-]		
Definition	Derived variable from Q 107 core questionnaire		
Universe	If code 2 on Q 105		
Literal question	In what month and year did you first start living permanently in [country]?		

a107AgeR: R's age of starting to live in country of interview

Notes
 R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
 Data is not available for Estonia.

# a121AgeR: R's age of starting to live in current dwelling	
Information	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=11250 /-] [Invalid=1608 /-] [Mean=21.462 /-] [StdDev=14.694 /-]
Definition	Derived variable from Q 115 core questionnaire
Literal question	In what month and year did you start living in this [type of accommodation]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". Data is not available for Estonia.

a150AgeR: R's age of achieving the current education level

Information	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=11543 /-] [Invalid=1315 /-] [Mean=18.83 /-] [StdDev=5.123 /-]		
Definition	Derived variable from Q 122 core questionnaire		
Literal question	In what month and year did you reach that level?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".</p> <p>Data is not available for Norway.</p>

Statistics [NW/ W]	[Valid=2238 /-] [Invalid=10620 /-] [Mean=52.866 /-] [StdDev=7.024 /-]
Definition	Derived variable from Q 240 core questionnaire
Universe	If R has 2 or more grandchildren
Literal question	In what month and year was the youngest of your grandchildren born?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of youngest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a301AgeR: R's age at start of living with current partner

Information	[Type= discrete] [Format=numeric] [Range= 1-74] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=8127 /-] [Invalid=4731 /-] [Mean=22.519 /-] [StdDev=5.679 /-]
Definition	Derived variable from Q 301 core questionnaire
Universe	If R lives together with a partner
Literal question	In what month and year did you and he/she first start living together?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a303b: Country of birth of the partner			
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# a303cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=56 /-] [Invalid=12802 /-] [Mean=16.75 /-] [StdDev=12.547 /-]		
Definition	Derived variable from Q 303.c core questionnaire		
Universe	If code 2 on Q 303.a		
Literal question	In what month and year did he/she first start living permanently in [country]?		
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a310: Have relationship to somebody without cohabitation

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=4267 /-] [Invalid=8591 /-]
Definition	Q 306 core questionnaire
Universe	If R does NOT have a co-resident partner
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.

Value	Label	Cases	Percentage
1	yes	689	16.1%
2	no	3578	83.9%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	39

a316cAgeP: Partner's age at start of permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 10-34] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=4 /-] [Invalid=12854 /-] [Mean=23.75 /-] [StdDev=10.404 /-]
Definition	Derived variable from Q 312.c core questionnaire
Universe	If code 2 on Q 312.a
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated)

Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=6542 /-] [Invalid=6316 /-] [Mean=0.546 /-] [StdDev=1.433 /-]
Definition	Consolidated variable from variables a302bTdiff and a314bTdiff (derived variables from Q 302.b and Q 310.b core questionnaire).
Universe	If R is married with partner (Co-resident partner: code 1 on Q 302.a - Non-resident partner: code 1 on Q 310.a)
Literal question	In what month and year did you marry?
Notes	This variable measures a different thing for

a372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated)

- Rs with co-resident partners: Time elapsed (years) between start of living together and marriage
 - and Rs with non-resident partner: Time elapsed (years) between start of relationship and marriage

The time of starting to live together was deducted from the answers to Q 301 and Q307. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded

a374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=60 /-] [Invalid=12798 /-] [Mean=17.217 /-] [StdDev=12.464 /-]
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).
Universe	If R's partner not born in [country]
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?

a374cAgeP: Partner's age of obtaining permanent residence

Notes Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a621AgeP: Partner's age at last use of anything to prevent pregnancy

Universe	If code 0 on Q 620
Literal question	In what month and year did you last use or do anything to prevent pregnancy?
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at last use of anything to prevent pregnancy was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
