## Information for respondents

This survey is conducted by the **Hungarian Demographic Research Institute**, and you **already** participated in it **two times** (in 2001/2002 and 2004/2005). Since 2001 we have contacted **about 15,000 people** every 3–4 years in order to learn about their changing their **life circumstances**, about the factors that influence **family formation, employment, preparation for retirement** as well as the **life of older people**. A few months ago we sent you a letter letting you know that we would **contact you again** at the **end of 2008** to answer some questions. As the main focus of our research is **changes** in the past 7 years, it is of **utmost importance that the same person answers the questionnaire each and every time!**

Your name and address were randomly selected from the **national residence register** in 2001. Your personal information has been treated confidentially since the first survey, according to the **Law on Data Protection** and the **Law on Statistics**. The data have been used **exclusively for scientific purposes**. We'll keep your name and address in order to be able to contact you again. However, the data will be processed **anonymously**, and the results are **published only in a summarised form**.

To the letter we recently sent you we attached a **booklet** about the most important results of the previous survey. We would like to do the same after the present survey. The results of the research are being **used** in several ways by **experts** working towards the education of the young, the improvement of families' lives and the problems of the elderly.

We would be grateful if you could kindly contribute to the accomplishment of our goals through answering the following questionnaire.

It will take about **an hour** to answer the questions.

## Interviewer instructions

Questions must always be read out word by word!

The line indicates the end of the text you are supposed to read out. The text below the line must not be read out, only the answers marked.

9 – DK, 99 – DK, 9999 – DK

The DK option is to be marked only when the respondent does not know how to answer the question. If the questionnaire does not contain this option, it may be added by hand.

8, 88 – does not wish to answer

The respondent does not wish to answer the question. This option is already available in a few sensitive questions, in other cases it may be added by hand.

→ GO TO ...!

Routing sign: after answering, you are to go to the question indicated.

**421: IF LIVES WITH SPOUSE!  
OTHERWISE → GO TO 501!**

Instructions with grey background refer to specific groups of respondents.

**CHOOSE ONLY ONE REASON!**

Instructions for the interviewer are put in frames.
