Generations and Gender Survey Austria Wave 1 & Wave 2 (Austria Wave 1 & Wave 2)

"Familienentwicklung in Österreich" (Development of the family in Austria)

Overview

Identification	GGSW1.W2.21

Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.
In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:
- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

Kind of Data	Survey data.
Unit of Analysis	Individuals.

Scope & Coverage

Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2008-2013
Countries	Austria

Geographic Coverage

Whole territory of Austria.

Universe

WAVE 1
Sufficiently German speaking men and women aged 18-45 on July 1st 2008 living in private households in Austria.

WAVE 2
Panel survival: 78%; age range 18-49

Producers & Sponsors

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE
1. Sampling frame
1.1 Type of frame: A real random sample of individuals (1) within the targeted age ranges (2) living in private households, drawn from the central national population register (Zentraler Melderegister; MR).
1.2 Frame coverage: As the sample was drawn from the central register, we should have full coverage. Some people who had moved in-between date of sampling (July 2008) and survey (September 2008-February 2009) were harder to identify; additional procedures had to be engaged (passing the updated contact information to another interviewer, who is responsible for this region) but even some of them could be found and interviewed. Nobody should be excluded a-priori.
1.3 Frame size: 9,006.
1.4 Level of units available: Individuals.

2. Sampling method
2.1 Sampling method type: SRS (Simple Random Sampling).
2.2 Sampling stage definition
- PSU: Individuals aged 18-45.
- SSU: NA.
- TSU: NA.
2.3 Sampling stage size
- PSU: 9,006.
- SSU: NA.
- TSU: NA.
2.4 Unit selection: Random number generator.
2.5 Final stage unit selection: SRS (Simple Random Sampling).
2.6 Within Household unit selection: Random selection is based on registered individuals (see above). Selection did not depend on any household characteristics.
2.7 Stratification: Explicit - by design we draw 60% women and 40% men (3000 : 2000 in net sample).
2.8 Sample size:
- Starting size sample: Gross sample size: 9,006; Net sample size: 5,000 (not all addresses within the gross sample needed to be contacted).
- Aimed total size at Wave 1: 5,000 (Age range: 18-45).

- Aimed total size at Wave 3: 4,050 cases with full panel information expected.
2.9 Estimated Non-response
- Initial non-response: 36%.
- Yearly attrition: We expect about 12% attrition in the second wave, and 8% at the third wave. At the end of the interview, wave 1, 96% agreed to be interviewed again.
- Non response measures: Oversampling
- Within household non-responses measures: None.

WAVE 2 SAMPLING PROCEDURE
Database from Wave 1 + “refresher sample” of young respondents aged 18–22. However, these respondents are excluded from the harmonised datafile.

Response Rate
WAVE 1
Response rate - Final disposition codes:
I = complete interview: 5,000
P = partial interview: 132
NE = non-eligible : 769
NC = non-contact : 867
R = refusal: 1943
O = other non-response: 295
UC = unknown eligibility, contacted
UC = unknown eligibility, non-contact: 867
Note: As we know that all persons randomly selected (by sex & age) from the population register in the gross sample are/ should be eligible, our missing-codes do not differentiate between these two UC ("unknown eligibility').
eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA
eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Weighting
WAVE 1
Yes, asymptotic weightig procedures:
- step1: age[1] * sex; labour market participation * sex * age[5]
- step2: Land of origin; form of (co)habitation
- step3: Parity of women.
Two weighting variables:
1) Weight: Standardized weight based on the country specific population weight (recommended for use) .
2) Population Weight: Country specific population weight.

Data Collection

Data Collection Dates	start 2008-09-15 end 2009-02-15 start 2012-10 end 2013-05
Data Collection Mode	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)

Data Collection Notes
WAVE 1 DATA COLLECTION
1. Interviewers
1.1 Total number of interviewers: 153
1.2 Number of interviewers in the field: No exact information about that. Basically, we worked with the same staff for the whole period. In November 2008 about 30 interviewers were taken in additionally.
1.3 Network organization: Centralized.
1.4 Working arrangement of interviewers: Contracted, no students, experienced professionals.
1.5 Payment of interviewers: Per interview.

2. Interviewer training
2.1 General interviewing: We had spent a whole day on GGS-training; main points of agenda [1] programme presentation (GGP, what for ~2 hrs); [2] presentation of instrument (CAPI-demo; ~3 hrs); [3] special small group training and interview simulation for the most sensitive parts of the interview ~ up to 4 hrs.
2.2 Survey specific: See above.
2.3 Length: See above.
2.4 Control of performance: Control of performance: Path following routine within CAPI; automated tests within CAPI; 5% were checked by recontacting; just 1 interview was discovered as faked. Another interviewer had interviewed the identically named father instead of the son.
2.5 Interviewer survey: Yes, see above.

3. Contact protocols
3.1 Advance letter: Yes; two letters, one by STAT-office, the other by the Federal Minister of family affairs.
3.2 Cold contacts: (1) Letters, (2) Telephone to arrange date and time of the interview, (3) Face-to-face-interview.
3.3 Scheduling / scattering: Arrangement of date & time was within responsibility of the interviewer.
3.4 Contact history: Yes, within the data production file.
3.5 Min number of contacts: No.
3.6 Max number of contacts: Not prescribed, just recommended (5-8 times, depending on household composition, sex & age of respondent, region).

4. Questionnaire localization
4.1 Validation: No.
4.2 Pre-test: Yes. Some country-specific answers were added in the questionnaire. As to the pilot, Germany conducted the survey in December 2005, the surveys are quite identical, so the Germans "executed our pilot". Intensive checks and simulations were made regarding the CAPI-programme, about 30 test-interviews were conducted, but not a pilot study in it's formal sense.
4.3 Length of interview: 64 minutes (average mean); 60 minutes (median). Respondents were "paid" with a supermarket-cheque (€15,-). We developed a small questionnaire with specific questions for the partner and recommended that the partner should fill in this written questionnaire in another room, if possible. We had special trainings on the sensitive questions.

Questionnaires
Structured questionnaire in German. It was used the German version as translated for German GGS, with some modifications due to language differences between the two countries.

Data Collector(s)	Statistics Austria (STAT)

Supervision
WAVE 1
1. Dealing with nonresponse
1.1 Screening: Yes, by the first questions the information imputed from the centran register was checked.
1.2 Refusal conversion: Basically, the respondents showed a high grade of cooperativeness. For some items the non-resonse rate is significantly higher, but that's a respondent's decision we have to accept.
1.3 Incentives: Yes (supermarket cheque of €15,-).

2. Tracking of sampled units
2.1 Respondent contact information: Yes, some contact details of the respondent were collected.
2.2 Other contact information: No.
2.3 Cards: A "thank-you-letter" was sent to all the respondents. As Austria has a very good and recent centralized registration system (Zentraler Melderegister), we are in the position to follow the repondent within Austria. Just for verifying, we also send christmas greeting cards etc. to get aware of some emigrants etc. (the central register will give us the adresses of all respondents that have moved within Austria. So, we still cannot catch the emigrated, but we are keeping track of the within-Austria-migration).
2.4 Additional surveys: None.
2.5 Administrative records: Yes, again part of production file; Respondent-ID <= Status change.

Data Processing & Appraisal

Data Editing

WAVE 1

We had some automated consistency checks during the CAPI-interview. After completion the ex-post consistency checks were activated, like some family relations, starting + ending dates, etc.

Files Description

Dataset contains 2 file(s)

GGS_Wave1_Austria_V.4.2.	
# Cases	5000
# Variable(s)	1316
File Structure	Type: relational Key(s): arid (R identification number)

File Content

GGS Wave 1

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.
The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.
Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.
Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.
A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401.
In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave1, version 4.2.

IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):
The update from v4.1 to v4.2 does not include corrections of existing variables.
The update only includes additional variables which are derived from the pre-existing datasets
- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.
- Variables derived from month and year variable: a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.
- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.
- Variables derived from frequency and unit variables:
a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):
- Variables corrected: amarstat ankids anpartner, a540t, a208c* (now with corrected labels).
- Variables now available: aweight_2101

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):
- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsize ahhtype ahhsize ahhtype.
- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.
- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945.
- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627*, a628*, a629*, a631*, a383 (now rounded)
- New weight variables: aweight_2101 Country specific population weight, aweight Standardized weight based on the country specific population weight (recommended for use).

FIRST DATASET RELEASED: V. 3.0 (November 2010).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more then one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the quetionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to loose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:
- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,

- frequency and unit variables.
Occupation variables are recoded into ISCO-88 1 digit.
Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.
For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data
The following missing values have been assigned:
- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

GGS_Wave2_Austria_V.1.2.

# Cases	3912
# Variable(s)	1342
File Structure	Type: relational Key(s): arid (R identification number)

File Content
GGS Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Activity and Education History, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.
The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.
Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.
Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.
A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401.
In order to have an overview of GGS country code, please refer to the variable "acountry".

Version
Harmonized dataset, GGS Wave2, version 1.2.

FIRST DATASET RELEASED: V.1.2. (April 2015).

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015)
The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnnumdissol, bnumdivorce, bnnumdivorce, bnnummarriage, bnummarriage, bnumpartnerships, bnnumpartnerships,

bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR , bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnnumworkstatuses, bnnumstudentstatuses, bnnumemplstatuses, bnnumselfemplstatuses, bnnumhelpfamstatuses, bnnumunemplstatuses, bnnumretiredstatuses, bnnummilitarystatuses, bnnumhomestatuses, bnnummatleavestatuses, bnnumparleavestatuses, bnnumdisabilitystatuses, bnnumotherstatuses, bnnum1401, bnnum1501, bnnum1801, bnnum1301, bnnumparttime, bnnumfulltime, bnnumboth, bnnumparttime_1801, bnnumparttime_1802, bnnumpartfulltime_1803, bnnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):
Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more then one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the quetionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.
5. Imputation
Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to loose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.
For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:
- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets
Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).
A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names
Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".
In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.
In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 2658 variable(s)

amonth: Mnth of interview

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=5000 /-] [Invalid=0 /-]
Definition	Q 001
Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...
Interviewer's instructions	Interviewer Instruction: Read the following text. This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

ahhtype: Household type Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96]

File : GGS_Wave1_Austria_V.4.2.

ahhtype: Household type Respondent

Statistics [NW/ W]	[Valid=5000 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables ahg3_*). Respondents' households were classified into groups according to the criteria explicated below. 1 "living alone": If the HH grid contains only R (hhsize=1). 2 "single parent": If HH grid contains R, at least one child (codes 2-6), and no parent. 3 "living with parents": If HH grid contains R, at least one parent (codes 7, 8), and no child. 4 "single parent living with parents": If HH grid contains R, at least one child and one parent, but no partner. 5 "couple with no children": If HH grid contains R, his/her partner (code 1); no child, nor parent. 6 "couple with children" If HH grid contains R, his/her partner, at least one child, and no parent. 7 "couple with parents" If HH grid contains R, his/her partner, at least one parent, and no child. 8 "couple with parents and children" If HH grid contains R, his/her partner, at least one parent and one child. 9"other types" HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	644	12.9%
2	single parent	256	5.1%
3	living with parents	885	17.7%
4	single parent living with parents	18	0.4%
5	couple with no children	754	15.1%
6	couple with children	2232	44.6%
7	couple with parents	34	0.7%
8	couple with parents and children	56	1.1%
9	other types	121	2.4%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhsize: Household size including Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-13] [Missing=*/96]
Statistics [NW/ W]	[Valid=5000 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables ahg1_*).

Value	Label	Cases	Percentage
1		644	12.9%

numbiol: Total number of biological children

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
Statistics [NW/ W]	[Valid=5000 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3); for non-resident children, copied from question a213 (code 1 on variable a213). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		2280	45.6%
1		943	18.9%
2		1240	24.8%
3		413	8.3%
4		97	1.9%
5		19	0.4%
6		5	0.1%
7		2	0.0%
8		1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numres: Number of children in the household

Information	[Type= discrete] [Format=numeric] [Range= 0-6] [Missing=*]
Statistics [NW/ W]	[Valid=5000 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	Copied from the Household grid (code 2,3,4,5 or 6 on variable ahg3). Note that this variable refers to all children present in the household : biological, adopted and foster children of the respondent and step children whatever their age.

Value	Label	Cases	Percentage
0		2438	48.8%

File : GGS_Wave1_Austria_V.4.2.

numres: Number of children in the household

Value	Label	Cases	Percentage
1		929	18.6%
2		1185	23.7%
3		351	7.0%
4		82	1.6%

a107AgeR: R's age of starting to live in country of interview

Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=816 /-] [Invalid=4184 /-] [Mean=18.735 /-] [StdDev=9.868 /-]
Definition	Derived variable from Q 107 core questionnaire
Universe	If code 2 on Q 105
Literal question	In what month and year did you first start living permanently in [country]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" Data is not available for Estonia.

a150AgeR: R's age of achieving the current education level

Information	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=4822 /-] [Invalid=178 /-] [Mean=19.869 /-] [StdDev=4.65 /-]
Definition	Derived variable from Q 122 core questionnaire
Literal question	In what month and year did you reach that level?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". Data is not available for Norway.

Definition	Q 201.a.c core questionnaire EST: country specific additional values "2201-usually R", "2202-R and P about equally", "2203-usually P".
Universe	If children younger than 14 are present in the household
Pre-question	I'm going to read out various tasks that have to be done when one lives together with children. Please tell me, who in your household does these tasks? Choose your answer from the card: Card 201-1 if no partner is present in the household; Card 201-2 if a partner is present.
Literal question	Staying at home with the children when they are ill
Interviewer's instructions	Start asking item by item from the table below. If the answer is 6 "Always or usually other persons in R's household", ask question 201b before proceeding to the next item.

Value	Label	Cases	Percentage
1	always R	749	35.1%
2	usually R	430	20.1%

a201a_c: HH tasks with children: Illness

Value	Label	Cases	Percentage
3	R and Partner about equally	319	14.9%
4	usually partner	349	16.4%
5	always partner	196	9.2%
6	always or usually other persons in the household	9	0.4%
7	always or usually someone not living in the household	62	2.9%
8	children do it themselves	20	0.9%
2201	usually R	0	
2202	R and P about equally	0	
2203	usually P	0	
97	does not know	0	
98	refusal	0	
99	no response/not applicable	23

a302bAgeR: R's age of marrying current spouse

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a302bTdiff: Time elapsed between start of living together and marriage (years)

Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1917 /-] [Invalid=3083 /-] [Mean=2.986 /-] [StdDev=3.137 /-]
Definition	Derived variable from Q 302.b core questionnaire
Universe	If code 1 on question 302.a
Literal question	In what month and year did you marry?
Notes	The time of starting to live together was deducted from the answer to Q 301. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.

Universe	If R is married with partner (Co-resident partner: code 1 on Q 302.a - Non-resident partner: code 1 on Q 310.a)
Literal question	In what month and year did you marry?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when married current spouse was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated)

Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1934 /-] [Invalid=3066 /-] [Mean=2.98 /-] [StdDev=3.136 /-]
Definition	Consolidated variable from variables a302bTdiff and a314bTdiff (derived variables from Q 302.b and Q 310.b core questionnaire).
Universe	If R is married with partner (Co-resident partner: code 1 on Q 302.a - Non-resident partner: code 1 on Q 310.a)
Literal question	In what month and year did you marry?
Notes	This variable measures a different thing for - Rs with co-resident partners: Time elapsed (years) between start of living together and marriage - and Rs with non-resident partner: Time elapsed (years) between start of relationship and marriage The time of starting to live together was deducted from the answers to Q 301 and Q307. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded

a374cAgeP: Partner's age of obtaining permanent residence

Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=476 /-] [Invalid=4524 /-] [Mean=23.057 /-] [StdDev=8.764 /-]
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).
Universe	If R's partner not born in [country]
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

a871AgeR: R's age at start of current activity status

Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=4772 /-] [Invalid=228 /-] [Mean=25.972 /-] [StdDev=7.594 /-]
Definition	Generated from consolidated variables a871m and a871y.
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" This variable is not available for Belgium.

a916: Did partner have any job/business before being in military, social service

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=16 /-] [Invalid=4984 /-]
Definition	Q 916 core questionnaire
Universe	If code 9 on Q 901
Literal question	Did your partner/spouse have a job or business directly before his/her military or social service started?

Value	Label	Cases	Percentage
1	yes	8	50.0%
2	no	8	50.0%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	0	
Sysmiss		4984	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

a917: Partner's last occupation (see code ISCO)

Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/9997/9998/9999]
Statistics [NW/ W]	[Valid=122 /-] [Invalid=4878 /-]
Definition	Q 917 core questionnaire DEU: only country specific values "1401-farmer", "1402-highly skilled profession (medicin, lawyer etc.)", "1403-self-employed", "1404-civil servant, judge, officer", "1405-clerk", "1406-worker", "1407-still in training", "1408-paid family worker".
Universe	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.
Pre-question	I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.

a917: Partner's last occupation (see code ISCO)

Literal question	What was his/her last occupation? Please describe the principal activity he/she performed.
Notes	ISCO '88 code must be regarded
