Generations and Gender Survey Austria Wave 1 & Wave 2 (Austria Wave 1 & Wave 2)

"Familienentwicklung in Österreich" (Development of the family in Austria)

Overview	
Identification	GGSW1.W2.21
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data.
Unit of Analysis	Individuals.

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2008-2013
Countries	Austria
<p>Geographic Coverage</p> <p>Whole territory of Austria.</p>	
<p>Universe</p> <p>WAVE 1</p> <p>Sufficiently German speaking men and women aged 18-45 on July 1st 2008 living in private households in Austria.</p> <p>WAVE 2</p> <p>Sufficiently German speaking men and women aged 18-49 (Wave 1 respondents + refreshers) on September 1st 2012 living in private households in Austria.</p> <p>Concerning panel respondents: panel survival: 78%; age range 22-49</p>

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: A real random sample of individuals (1) within the targeted age ranges (2) living in private households, drawn from the central national population register (Zentraler Melderegister; MR).

1.2 Frame coverage: As the sample was drawn from the central register, we should have full coverage. Some people who had moved in-between date of sampling (July 2008) and survey (September 2008-February 2009) were harder to identify; additional procedures had to be engaged (passing the updated contact information to another interviewer, who is responsible for this region) but even some of them could be found and interviewed. Nobody should be excluded a-priori.

1.3 Frame size: 9,006.

1.4 Level of units available: Individuals.

2. Sampling method

2.1 Sampling method type: SRS (Simple Random Sampling).

2.2 Sampling stage definition

- PSU: Individuals aged 18-45.

- SSU: NA.

- TSU: NA.

2.3 Sampling stage size

- PSU: 9,006.
- SSU: NA.
- TSU: NA.
- 2.4 Unit selection: Random number generator.
- 2.5 Final stage unit selection: SRS (Simple Random Sampling).
- 2.6 Within Household unit selection: Random selection is based on registered individuals (see above). Selection did not depend on any household characteristics.
- 2.7 Stratification: Explicit - by design we draw 60% women and 40% men (3000 : 2000 in net sample).
- 2.8 Sample size:
 - Starting size sample: Gross sample size: 9,006; Net sample size: 5,000 (not all addresses within the gross sample needed to be contacted).
 - Aimed total size at Wave 1: 5,000 (Age range: 18-45).
 - Aimed total size at Wave 3: 4,050 cases with full panel information expected.
- 2.9 Estimated Non-response
 - Initial non-response: 36%.
 - Yearly attrition: We expect about 12% attrition in the second wave, and 8% at the third wave. At the end of the interview, wave 1, 96% agreed to be interviewed again.
 - Non response measures: Oversampling
 - Within household non-responses measures: None.

WAVE 2 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: (1) panel sample: each Wave 1 respondent still living in Austria was recontacted, 78% panel survival; (2) refresher sample: young adults aged 18-22 (not targeted in Wave 1) taken in (3) refreshers of age cohorts that showed low panel survival.

ATTENTION: Just panel respondents are included in the harmonised datafile. The full file (panel + refreshers) can be obtained on request from ggp@oif.ac.at.

SO, FOR USERS OF THE HARMONISED FILE, THE RELEVANT INFORMATION ON SAMPLE SIZE IS SHOWN IN (1) BELOW !

1.2 Frame coverage: (2) and (3) based of central national population register (Zentraler Melderegister, ZMR)

1.3 Frame size: (1) 5000, (2) 1372, (3) 128.

1.4 Level of units available: Individuals.

2. Sampling method

2.1 Sampling method type: (2) and (3) SRS (Simple Random Sampling); (1) drawn by SRS for wave 1.

2.2 Sampling stage definition

- PSU: Panel Sample
- SSU: Individuals 18-22 (refresher sample)
- TSU: Individuals (females; higher age cohorts)

2.3 Sampling stage size

- PSU: 6720

2.4 Unit selection: (2 & 3) Random number generator.

2.5 Final stage unit selection: SRS (Simple Random Sampling).

2.6 Within Household unit selection: Random selection is based on registered individuals (see above). Selection did not depend on any household characteristics.

2.7 Stratification: Explicit - by design we draw 60% women and 40% men in wave 1. sample (2) also 60% women 40% men.

2.8 Sample size:

- Starting size sample:
- Aimed total size at Wave 1: 5000
- Aimed total size at Wave 3: 3400

2.9 Estimated Non-response

- Initial non-response: 42%
- Yearly attrition: Attrition had become higher as expected. We nearly had 22% panel mortality. This was partly due to the fact that the interval between the panel waves had widened up to 4 years!
- Non response measures: Incentives, additional sampling for cohorts with higher panel mortality
- Within household non-responses measures: None.

Response Rate**WAVE 1**

Response rate - Final disposition codes:

I = complete interview: 5,000

P = partial interview: 132

NE = non-eligible : 769

NC = non-contact : 867

R = refusal: 1943

O = other non-response: 295

UC = unknown eligibility, contacted

UC = unknown eligibility, non-contact: 867

Note: As we know that all persons randomly selected (by sex & age) from the population register in the gross sample are/ should be eligible, our missing-codes do not differentiate between these two UC ("unknown eligibility").

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Overall response rate: 60.7%.

WAVE 2

FOR USERS OF THE HARMONISED FILE (including only panel respondents), THE RELEVANT INFORMATION ON FINAL DISPOSITION CODES IS SHOWN IN (1) BELOW!

I = complete interview: (1) 3912 (2) 763 (3) 54

P = partial interview: no stastics on this group; summarized together with R (refusals)

NE = non-eligible : 0

NC = non-contact : (1) 57 (2) 84 (3) 0

R = refusal: (1) 707 (2) 387 (3) 56

O = other non-response: (1) 0 (2) 8 (3) 0

UC = unknown eligibility, contacted: 0

UC = unknown eligibility, non-contact: (1) 324 (2) 21 (3) 1

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: 0

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: 0

ATTRITION BETWEEN WAVE 1 AND WAVE 2

The Austrian GGS panel has a relatively low dropout (22%) and is affected by a small bias towards family-oriented persons as well as less-educated respondents and persons with migration backgrounds, but the data can be used without concern about selectivity.

Isabella Buber-Ennsner, Attrition in the Austrian Generations and Gender Survey: Is there a bias by fertility-relevant aspects?, Demographic Research (31), 2014, 459-496.

Weighting**WAVE 1**

Yes, asymptotic weightig procedures:

- step1: age[1] * sex; labour market participation * sex * age[5]

- step2: Land of origin; form of (co)habitation

- step3: Parity of women.

Two weighting variables:

1) Weight: Standardized weight based on the country specific population weight (recommended for use) .

2) Population Weight: Country specific population weight.

WAVE 2

Yes, asymptotic weightig procedures:

step1: age[1] * sex; labour market participation * sex * age[5]

step2: Land of origin; form of (co)habitation

step3: Parity of women.

Data Collection	
Data Collection Dates	WAVE 1: start 2008-09-15 WAVE 1: end 2009-02-15 WAVE 2: start 2012-09-22 WAVE 2: end 2013-05-27
Data Collection Mode	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)
<u>Data Collection Notes</u> WAVE 1 DATA COLLECTION 1. Interviewers 1.1 Total number of interviewers: 153 1.2 Number of interviewers in the field: No exact information about that. Basically, we worked with the same staff for the whole period. In November 2008 about 30 interviewers were taken in additionally. 1.3 Network organization: Centralized. 1.4 Working arrangement of interviewers: Contracted, no students, experienced professionals. 1.5 Payment of interviewers: Per interview. 2. Interviewer training 2.1 General interviewing: We had spent a whole day on GGS-training; main points of agenda [1] programme presentation (GGP, what for ~2 hrs); [2] presentation of instrument (CAPI-demo; ~3 hrs); [3] special small group training and interview simulation for the most sensitive parts of the interview ~ up to 4 hrs. 2.2 Survey specific: See above. 2.3 Length: See above. 2.4 Control of performance: Control of performance: Path following routine within CAPI; automated tests within CAPI; 5% were checked by recontacting; just 1 interview was discovered as faked. Another interviewer had interviewed the identically named father instead of the son. 2.5 Interviewer survey: Yes, see above. 3. Contact protocols 3.1 Advance letter: Yes; two letters, one by STAT-office, the other by the Federal Minister of family affairs. 3.2 Cold contacts: (1) Letters, (2) Telephone to arrange date and time of the interview, (3) Face-to-face-interview. 3.3 Scheduling / scattering: Arrangement of date & time was within responsibility of the interviewer. 3.4 Contact history: Yes, within the data production file. 3.5 Min number of contacts: No. 3.6 Max number of contacts: Not prescribed, just recommended (5-8 times, depending on household composition, sex & age of respondent, region). 4. Questionnaire localization 4.1 Validation: No. 4.2 Pre-test: Yes. Some country-specific answers were added in the questionnaire. As to the pilot, Germany conducted the survey in December 2005, the surveys are quite identical, so the Germans "executed our pilot". Intensive checks and simulations were made regarding the CAPI-programme, about 30 test-interviews were conducted, but not a pilot study in it's formal sense. 4.3 Length of interview: 64 minutes (average mean); 60 minutes (median). Respondents were "paid" with a supermarket-checke (€15,-). We developed a small questionnaire with specific questions for the partner and recommended that the partner should fill in this written questionnaire in another room, if possible. We had special trainings on the sensitive questions. WAVE 2 DATA COLLECTION 1. Interviewers 1.1 Total number of interviewers: 146 1.2 Number of interviewers in the field: All interviewers were in for the whole field phase. 1.3 Network organization: Centralized. 1.4 Working arrangement of interviewers: Contracted, no students, experienced professionals.	

1.5 Payment of interviewers: Per interview.

2. Interviewer training

2.1 General interviewing: We had a whole training day, where we (1) presented the GGS2 programme (most interviewer also were in GGS1)[2:30 h] (2) presented the CAPI-demo [1:30], (3) had small workings groups for CAPI-based simulation of most sensitive parts of the questionnaire [3:30] and (4) had specialized training units for F2F interviewing the most sensible parts [up to 2h]

2.2 Survey specific: See above

2.3 Length: See above

2.4 Control of performance: Path following routine within CAPI; automated tests within CAPI; 5% were checked by recontacting; no interview was discovered as faked. Ex post we had to eliminate 6 cases, where obviously another person had been interviewed in wave 1.

2.5 Interviewer survey: Yes, see above.

3. Contact protocols

3.1 Advance letter: Letter by STAT

3.2 Cold contacts: (1) Letters, (2) Telephone to arrange date and time of the interview, (3) Face-to-face-interview.

3.3 Scheduling / scattering: NA

3.4 Contact history: Yes, within the data production file.

3.5 Min number of contacts: No.

3.6 Max number of contacts: Not prescribed, just recommended (5-8 times, depending on household composition, sex & age of respondent, region).

4. Questionnaire localization

4.1 Validation: No.

4.2 Pre-test: We had several test interviews to some dozens of real persons. In addition, we held test interviews (role play) between the 147 interviewers, especially in the sections of the questionnaire that were rather complicated.

4.3 Length of interview: Length of interview: 65 minutes (average mean); 64 minutes (median). Respondents were "paid" with a supermarket-cheque (€20,-). We developed a small questionnaire with specific questions for the partner and recommended that the partner should fill in this written questionnaire in another room, if possible. We had special trainings on the sensitive questions.

Questionnaires

Structured questionnaire in German. It was used the German version as translated for German GGS, with some modifications due to language differences between the two countries.

Data Collector(s)

Statistics Austria (STAT)

Supervision

WAVE 1

1. Dealing with nonresponse

1.1 Screening: Yes, by the first questions the information imputed from the centran register was checked.

1.2 Refusal conversion: Basically, the respondents showed a high grade of cooperativeness. For some items the non-resonse rate is significantly higher, but that's a respondent's decision we have to accept.

1.3 Incentives: Yes (supermarket cheque of €15,-).

2. Tracking of sampled units

2.1 Respondent contact information: Yes, some contact details of the respondent were collected.

2.2 Other contact information: No.

2.3 Cards: A "thank-you-letter" was sent to all the respondents. As Austria has a very good and recent centralized registration system (Zentraler Melderegister), we are in the position to follow the repondent within Austria. Just for verifying, we also send christmas greeting cards etc. to get aware of some emigrants etc. (the central register will give us the adresses of all respondents that have moved within Austria. So, we still cannot catch the emigrated, but we are keeping track of the within-Austria-migration).

2.4 Additional surveys: None.

2.5 Administrative records: Yes, again part of production file; Respondent-ID <= Status change.

WAVE 2**1. Dealing with nonresponse**

1.1 Screening: Yes, by the first couple of questions the information imputed from the central register and/or wave 1 was checked.

1.2 Refusal conversion: Basically, the respondents showed a high grade of cooperativeness. For some items the non-response rate is significantly higher, but that's a respondent's decision we have to accept.

1.3 Incentives: Yes (supermarket cheque of €20,-).

2. Tracking of sampled units

2.1 Respondent contact information: Yes, some contact details of the respondent were collected. As we can follow the respondents within Austria by the Austrian central register, we should find them again. In fact we just had a handful of blanks from wave 1 - one had died, two were institutionalized (prison, rehab) and some have emigrated.

2.2 Other contact information: No.

2.3 Cards: A "thank-you-letter" was sent to all the respondents. As Austria has a very good and recent centralized registration system (Zentraler Melderegister), we are in the position to follow the respondent within Austria. Just for verifying, we also send christmas greeting cards etc. to get aware of some emigrants etc. (the central register will give us the addresses of all respondents that have moved within Austria. So, we still cannot catch the emigrated, but we are keeping track of the within-Austria-migration).

2.4 Additional surveys: No.

2.5 Administrative records: Yes, see above.

Data Processing & Appraisal**Data Editing****WAVE 1**

We had some automated consistency checks during the CAPI-interview. After completion the ex-post consistency checks were activated, like some family relations, starting + ending dates, etc.

WAVE 2

Data was compared to wave 1 so as to detect and correct inconsistencies. This was done for reported number of children and information on partners. In case of inconsistencies, wave 2 data was replaced with wave 1 data. In few cases, data should be corrected in wave 1 datafile instead. Discrepancies on partnership histories and employment histories were not corrected.

The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

Files Description

Dataset contains 1 file(s)

GGG_Wave2_Austria_V.1.3.	
# Cases	3912
# Variable(s)	1389
File Structure	Type: relational Key(s): arid (R identification number (W2))
<p><u>File Content</u> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Activity and Education History, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>FIRST DATASET RELEASED: V.1.2. (April 2015).</p>	
<p><u>Processing Checks</u> WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".</p>	
<p><u>Missing Data</u> The following missing values have been assigned:</p> <ul style="list-style-type: none"> - 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables") - 7, 97, 997, etc. = Don't know - 8, 98, 998, etc. = Refusal - 9, 99, 999, etc. = Not-applicable/no response 	
<p><u>Notes</u></p>	

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 1389 variable(s)

File GGS_Wave2_Austria_V.1.3.							
#	Name	Label	Type	Format	Valid	Invalid	Question

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time. We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

blivingwithpartner: Respondent is living with their current partner (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*/6]
Statistics [NW/ W]	[Valid=3912 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's partner is present in the Household grid; "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	2712	69.3%
2	No	1200	30.7%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnrespartafterw1: Starting living with current partner after {wave 1} (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*/96]
Statistics [NW/ W]	[Valid=3912 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent started living with current partner after wave 1 (code 1 on question 312 "Partnership history" grid); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	426	10.9%
2	No	3486	89.1%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnnummarriage: Number of marriages since {wave 1} (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=3912 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The marriages that occurred between wave 1 and wave 2 (code 1 on question 303 or question 310). Note that this variable only includes marriages with co-resident partners, and it does not include marriages present at wave 1.

Value	Label	Cases	Percentage
0		3430	87.7%
1		444	11.3%
2		32	0.8%
3		6	0.2%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnummarriage: Total number of marriages (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=3912 /-] [Invalid=0 /-]

File : GGS_Wave2_Austria_V.1.3.

bnummarriage: Total number of marriages (W2)

Definition	Derived variable
Notes	The total number of marriages reported at wave 1 (variable nummarriage at wave 1) PLUS the marriages between the two waves (variable bnummarriage). Note that for wave 1 this variable includes marriages with co-resident as well as non-resident partners, whereas for wave 2 it only refers to marriages with co-resident partners.

Value	Label	Cases	Percentage
0		1655	42.3%
1		1904	48.7%
2		306	7.8%
3		28	0.7%
4		13	0.3%
5		4	0.1%
6		2	0.1%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnumpartnerships: Number of co-resident partners Respondent had since {wave 1} (including current (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=3284 /-] [Invalid=628 /-]
Definition	Derived variable
Notes	The number of partnerships dissolutions that occurred between wave 1 and wave 2 (see variable bnnumdissol) PLUS the current partnership if one exists. Note that this variable only refers to resident partners since wave 1.

Value	Label	Cases	Percentage

# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3454 /-] [Invalid=458 /-] [Mean=50.056 /-] [StdDev=36.456 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bnduremplstatuses: Total duration (in month) of Rs working statuses as employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3556 /-] [Invalid=356 /-] [Mean=61.945 /-] [StdDev=69.476 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Literal question	When did this period of [activity] start? When did this period of [activity] end?		

bndursselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)

Notes Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Statistics [NW/ W]	[Valid=876 /-] [Invalid=3036 /-] [Mean=13.476 /-] [StdDev=21.277 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as unemployed since age 16 (code 5 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long t (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=81 /-] [Invalid=3831 /-] [Mean=11.679 /-] [StdDev=20.006 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		

# bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long t (W2)			
Notes		Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16 (code 11 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=0 -/] [Invalid=3912 -/]		
Definition	Derived variable from Q 117.		
Universe	If R's address has changed between the waves		
Literal question	In what month and year did you start living in this [type of accommodation]?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Statistics [NW/ W]	[Valid=3695 /-] [Invalid=217 /-]		
Definition	Derived variable from Q 114.		
Literal question	In what month and year did you reach that level?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=1200 /-] [Invalid=2712 /-]		
Definition	Q 325.		
Universe	If R does NOT have a co-resident partner.		
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.		
Value	Label	Cases	Percentage
1	yes	540	45.0%
2	no	660	55.0%
6	unknown	0	
7	does not know	0	
8	refusal	0

Statistics [NW/ W]	[Valid=48 /-] [Invalid=3864 /-]
Definition	Q 331.c.
Universe	If code 2 on Q 331.a
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated) (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-45] [Missing=*/997/998/999]		

# b372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated) (W2)	
Statistics [NW/ W]	[Valid=1752 /-] [Invalid=2160 /-] [Mean=3.686 /-] [StdDev=3.991 /-]
Definition	Consolidated variable from derived variables b372bAgeR and b371AgeR. It only refers to co-resident partner.
Universe	If R has a co-resident partner.
Notes	If information on the month of starting the relationship / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.
