Generations and Gender Survey France Wave 1 & Wave 2 (GGS France Wave 1 & Wave 2)

Étude des relations familiales et intergénérationnelles (ERFI)

Overview	
Identification	GGS.W1.W2.15
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2005-2008
Countries	FRANCE
<p>Geographic Coverage</p> <p>Whole metropolitan territory of France</p>	
<p>Universe</p> <p>WAVE 1</p> <p>French speaking persons aged 18 to 79 on December 31st, 2005 living in private household in France.</p> <p>WAVE 2</p> <p>Persons who took part at Wave 1 and agreed to be re-contacted for Wave 2 (88% of the 10,079 persons interviewed at Wave 1)</p>	

Producers & Sponsors

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: Dwelling lists: master sample of 1999 National Census data + sampling frame of dwellings constructed after march 1999.

1.2 Frame coverage: Whole population of metropolitan territory of France.

1.3 Frame size: Master sample of 1999 census: 2,022,889 dwellings (7% of all 1999 dwellings) from 349 primary units (of 3435 in census data).

1.4 Level of units available: dwellings.

2. Sampling method

2.1 Sampling method type: A first random sample of 16009 households addresses from 1999 census master sample (14752) and sampling frame of dwellings constructed after March 1999 (1257). To complete this first sample: two random samples of 1000 households addresses from 1999 census master sample (2*838) and sampling frame of dwellings constructed after March 1999 (2*162). So a total of 18009 dwelling addresses.

2.2 Sampling stage definition

- PSU: Cities if more than 20,000 habitants, local groups of towns if less than 20,000 habitants.

- SSU: Dwellings addresses.

- TSU: NA.

2.3 Sampling stage size

- PSU: 349

- SSU: 18009

- TSU: NA.

2.4 Unit selection: All primary units of the master sample were selected.

2.5 Final stage unit selection: Dwellings were selected using simple random sampling.

2.6 Within household unit selection: First-name method. Among those eligible in the household (age 18-79 years on December 31st, 2005), the person whose first name begins with the letter the closest to the beginning of the alphabet was selected.

2.7 Stratification: Explicit: Two stages stratification. First stage was done by dwelling categories with overrepresentation of main residences (5 categories: main residences at 1999 census, secondary residences at 1999 census, occasional residences

at 1999 census, vacant residences at 1999 census and dwellings built after 1999 census). The second stage was by age with overrepresentation of households whom referent person at 1999 census was in the scope of the survey (younger than 79 years old in 2005). The second stage was not done for new dwellings as the data on the age of these household's occupiers were not available.

2.8 Sample size:

- Starting size sample: 18009
- Aimed total size at Wave 1: 10000
- Aimed total size at Wave 3: none

2.9 Estimated Non-response

- Yearly attrition: None: the yearly attrition was not estimated.
- Non response measures: Oversampling : to reach the objective of 10000 respondents, the sample size was 18009.
- Within household non-responses measures: None - the household was marked as nonresponse.

WAVE 2 SAMPLING PROCEDURE

Sampling: panel (wave 1 database of addresses). All the Wave 1 persons who had agreed to be recontacted for a second interview (i.e., 8,341 respondents which is equal to 88% of Wave 1 respondents).

Response Rate

WAVE 1

Frequency of final disposition codes:

I = Complete interview: 10079

P = Partial interview: 48 (not included in the data base)

NE = Not eligible: 2430

NC = Non-contact: 1657

R = Refusal: 2242

O = Other non-response: 729

UC = Unknown eligibility, contacted: DK

UN = Unknown eligibility, non-contact: DK

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: DK

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: DK

WAVE 2

Frequency of final disposition codes:

I = Complete interview: 6,576 (however 42 were then removed from the dataset because the respondents were most certainly not those surveyed three years earlier).

P = Partial interview: 8

NE = Not eligible: 75 (respondents deceased) + 17 (respondents in institution) + 52 (respondents abroad)

NC = Non-contact: 221 (could not be contacted) + 16 (no household member corresponds to the person interviewed in 2005) + 249 (moved without leaving address)

R = Refusal: 794

O = Other non-response: 190 (could not be interviewed)+ 77 (could not be interviewed before the end of the collection period)

UC = Unknown eligibility, contacted: DK

UN = Unknown eligibility, non-contact: 21 (address could not be reached) + 45 (address card not processed)

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: DK

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: DK

Weighting

WAVE 1 WEIGHT VARIABLES

The country-specific weight variable (aweight_1501) was built at the respondent level to adjust the sample because of:

- an overrepresentation of women (56,6 %) in the sample compared with the structure of the French population (51,3 %),
- an under-representation of men,
- an over-representation of over-55s (in particular men),
- and an under-representation of 18-29 year-olds (again also more marked for men).

Non-response was corrected by fitting. Weighting variable was computed using the following variables: sex, age reached in 2005, citizenship, social and occupational group, type of household, number of household members, and size of urban unit.

Because of a rather strong distortion of the educational level (over-representation of the higher degrees), this variable was not taken into account in the weighting calculation.

The other weight variable (aweight) is a standardized weight based on the country specific population weight (recommended for use).

WAVE 2 WEIGHT VARIABLES

The country-specific weight variable (bweight_1501) was built to adjust the sample because of attrition between the two waves. This variable takes into account the attrition between the two waves as well as the weighting variable calculated with reference to Wave 1. Between the two waves, attrition was equal to approximately 35% (some people refused to participate in wave 2, some had died, some had moved without leaving an address, and some had gone to live in institutions). The data can therefore only be used in a longitudinal approach, or a cross-sectional approach representative of 2005, provided that a weighting variable is applied to correct for attrition and to fit the 2008 findings with those of 2005.

The other weight variable (bweight) is a standardized weight..

Data Collection

Data Collection Dates	Wave 1: start 2005-09-26 Wave 1: end 2005-12-03 Wave 2: start 2008-10-20 Wave 2: end 2008-12-12
Data Collection Mode	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)

Data Collection Notes

WAVE 1 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 552 interviewers of INSEE (data collector)

1.2 Number of interviewers in the field: Each interviewer had a fixed number of interviews to carry out. Some of them can finish the work earlier than others.

1.3 Network organization: At least two field coordinators in each of the 22 regional agencies of INSEE (data collector).

1.4 Working arrangement of interviewers: Fully employed survey administrators from INSEE.

1.5 Payment of interviewers: Paid per interview (completed interview: one hour paid, refusal: fixed compensation) + compensation for one day of training + travel expenses.

2. Interviewer training:

2.1 General interviewing: Interviewers were already trained in general interviewing techniques: CAPI, interviewing techniques, appointments taking and general knowledge on surveys carried out by INSEE.

2.2 Survey specific: In august 2005, professional regional trainers of INSEE were trained centrally at INED in GGS specific issues and then trained the 560 interviewers in each of the 22 French regions.

2.3 Length: General training: 6 days. Survey specific: 1 day.

2.4 Control of performance: The new interviewers were accompanied by the regional survey manager for their first interviews. Some of the experienced ones were accompanied too as part as their annual performance review.

2.5 Interviewer survey: None.

3. Contact protocols

3.1 Advance letter: Each household selected in the sample received an advanced letter with a leaflet introducing the survey and announcing the coming of an interviewer, the reason of his/her visit, the survey subject, the agencies involved in the survey, the future use of the data, etc. The household was also invited to visit the survey website (www-erfi.ined.fr) to find more information about the survey and the project.

3.2 Cold contacts: Face-to-Face

3.3 Scheduling / scattering: Yes. To get the highest response rate, contacts attempts were scattered over different days of the week and different parts of the day.

3.4 Contact history: Yes. For each contact attempt, the interviewer had to report the date, the time and the outcome in a grid.

3.5 Min number of contacts: 7.

3.6 Max number of contacts: 14.

4. Questionnaire localization

4.1 Validation: In March 2004, a test of the first version of the questionnaire was carried out by interviewing 111 persons (face to face paper) to improve the translation and evaluate the length of the interviewing.

4.2 Pre-test: Two pre-tests carried out using CAPI version of the questionnaire in November 2004 (134 respondents) and April 2005 (180 respondents).

4.3 Length of interview: Respondents were globally very cooperative. The average duration of interview was about 65 minutes, with a large variance according to the composition of the household and the complexity of the family structure and history of the respondent. A quarter of the interviews took place in the presence of another person. Some difficulties were encountered by respondents to answer fecundity questions. Two questions (religion appartenance and civil partnership) were considered as "sensitive" according to the French law and needed a signed authorization from the respondent. 6% of the respondents refused that their answers to both "sensitive" questions were recorded.

WAVE 2 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 454 interviewers of INSEE (data collector).

1.2 Number of interviewers in the field: Each interviewer had a fixed number of interviews to carry out. Some of them could finish the work earlier than others.

1.3 Network organization: At least two field coordinators in each of the 22 regional agencies of INSEE (data collector).

1.4 Working arrangement of interviewers: Fully employed survey administrators from INSEE.

1.5 Payment of interviewers: Paid per interview (completed interview: one hour paid, refusal: fixed compensation) + compensation for one day of training + travel expenses.

2. Interviewer training:

2.1 General interviewing: Interviewers were already trained in general interviewing techniques: CAPI, interviewing techniques, appointments taking and general knowledge on surveys carried out by INSEE.

2.2 Survey specific: In September 2008, professional regional trainers of INSEE were trained centrally at INED in GGS specific issues and then trained the 454 interviewers in each of the 22 French regions.

2.3 Length: General training: 6 days. Survey specific: 1 day.

2.4 Control of performance: The new interviewers were accompanied by the regional survey manager for their first interviews. Some of the experienced ones were accompanied too as part of their annual performance review.

2.5 Interviewer survey: None

3. Contact protocols

3.1 Advance letter: Each household which agreed to participate to Wave 2 received an advanced letter recalling the survey subject and announcing the coming of an interviewer, the reason of his/her visit, the agencies involved in the survey, etc. The household was also sent a brochure concerning the survey and the invitation to visit its website.

3.2 Cold contacts: Face-to-Face

3.3 Scheduling / scattering: If 2005 respondents were no longer present in the household, the interviewer made an appointment to meet them, and if they had moved to another zone, another interviewer was given the new address. When 2005 respondents had gone to live outside the regions covered by the survey (but within metropolitan France), the interviewers went beyond their usually allotted zone to meet them.

3.4 Contact history: Yes. For each contact attempt, the interviewer had to report the date, the time and the outcome in a grid.

3.5 Min number of contacts: Dk

3.6 Max number of contacts: DK

4. Questionnaire localization

4.1 Validation: No.

4.2 Pre-test: Two pre-test were carried out. The first was limited on the new module on occupational history introduced with Wave 2. It was carried out in november 2006 using Paper and Pencil on 20 persons of all ages. This test showed recall problems for older persons and persons with numerous occupational changes. There were also problems of data overlap which were then overcome thanks to CAPI automation. The second test was carried on the entire questionnaire from March 24 to April 25, 2008, in two different parts of France (Aquitaine and Limousin) on 180 persons. The test could not be run on people who had participated 3 years previously. In order to check "the retrieval chain of data collected in 2005" (i.e., the filter questions in Wave 2 aimed at saving time) the test questionnaire was preceded by a short module focusing on the respondents' situation 3 years previously.

4.3 Length of interview: The average duration of interview was about 55 minutes, with a large variance depending on the complexity of the respondents' occupational history and hence their age. A third party was present in 25% of the 2005 interviews, whereas this percentage dropped to 18% in the 2008 interviews. The interviews went very well on the whole. This is confirmed by the fact that 97% of respondents agreed to participate to Wave 3. The main problems concerned the occupational history grid, which turned to be not so easy to complete especially for older respondents. As to the items considered "sensitive" by the Quality Label Committee of the French National Council for Statistical Information (CNIS) at Wave 1, the question about religion membership was no longer asked; the other one on civil partnership was not regarded as sensitive anymore.

Questionnaires

Structured questionnaire in French.

Data Collector(s)

Institut national d'études démographiques (INED)
Institut national de la statistique et des études économiques (INSEE)

Supervision

WAVE 1 ACTIONS

1. Dealing with nonresponse

1.1 Screening: No

1.2 Refusal conversion: Usual techniques of refusal conversion i.e. specify that personal information will stay confidential and not divulged to a third party, insisting on the research purpose of the survey and on its international dimension.

1.3 Incentives: No

2. Tracking of sampled units

2.1 Respondent contact information: Respondent's address and telephone number (home, mobile, work) were collected.

2.2 Other contact information: The interviewers were instructed to ask for the addresses of two persons in the respondent's circle of acquaintances (close family, friends) to remain able of resuming contact with the respondent via one of these persons in case of a move.

2.3 Cards: Various strategies were organized to keep in touch with a maximum number of persons. A thank you letter was sent to all the respondents, which varied in content according to 3 scenarios:

- if the respondent had refused the follow-up, he was thanked simply;

- if he/she had accepted the follow-up and given the address of at least one contact person, he was thanked by enclosing a "change of address card" as well as an e-mail and a phone number so that he can inform INED of any moves;

- if he/she had accepted the follow-up but if we had no contact person, he was thanked the same way as in the previous case and we added to the letter a "contact person card" and a prepaid envelope.

Four other mails were sent to every respondent between Wave 1 and Wave 2 (three mails with first results of the survey and a greetings card). The aim of these regular mailshots is to keep in touch but also to update the address file (death, change of address...).

2.4 Additional surveys: None.

2.5 Administrative records: No.

WAVE 2 ACTIONS

1. Dealing with nonresponse

1.1 Screening: No

1.2 Refusal conversion: As for Wave 1.

1.3 Incentives: No

2. Tracking of sampled units

2.1 Respondent contact information: Update of respondent's address and telephone number.

2.2 Other contact information: Record of respondent's circle of acquaintances addresses. In case no address was available, the 2005 addresses were reused.

2.3 Cards: The respondents who agreed to participate to Wave 1 were contacted by mail five times between the two waves, i.e., approximately every six months (see above documentation about wave 1). The respondents who had agreed to participate to Wave 1 were contacted by mail five times between the two waves, i.e., approximately every six months (see above documentation about wave 1). The same basic follow-up procedure was used with the respondents between Wave 2 and Wave 3 (two letters each year: initial results and a New Year greetings card, etc.).

2.4 Additional surveys: None.

2.5 Administrative records: No.

Data Processing & Appraisal

Data Editing

WAVE 1 CLEANING OPERATIONS

The datafile was cleaned (anonymized, wildcode checking...) by INED's survey department before being sent to data harmonization center for harmonization.

WAVE 2 CLEANING OPERATIONS

Data adjustment and cross matching between wave 1 and wave 2 were carried out by INED's survey department before being sent to data harmonization center for harmonization. Severe underreporting of children in Wave 2 was brought to light. For more detailed information, refer to the documentation about Wave 2 methodology under "Study Description - Other Study Description Materials".

Files Description

Dataset contains 1 file(s)

GGG_Wave2_France_V.1.3.	
# Cases	6533
# Variable(s)	1453
File Structure	Type: relational Key(s): arid (R identification number (W2))
<p><u>File Content</u> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> - Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype. - Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Ageb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, 	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: bage, b204*, b510, b530, b626, bn871* (only one country-specific value),
- Changes in the variable/value labels: b906b, bn1401sq, b203b (Country specific list of childcare arrangements has been recoded in GGS values as follows: a) "1-Babysitter (nanny)" comprises "Assistante maternelle", "Nourrice", "Garde à domicile", and "Babysitter", b) "2-Day care centre" does not correspond to any value in French GGS and it says empty, c) "3-Nursery or Preschool" comprises "Crèche", "Ecole maternelle", and "Halte-garderie", d) "4-After-school care-centre" comprises "Garderie avant ou après l'école", and "Centre aéré", e) "6-Other institutional arrangement" comprises "Autre organisation". PLEASE NOTE THAT THIS CODING DEVIATES FROM WAVE 1 VERSION 4.1. In V.4.1. the group "Centre aéré" has been erroneously coded as "Self organized childcare group". In a future revision, wave 1 will be made consistent with Wave 2.)
- Variables now available: b203*
- Variables dropped because all system missing: b875 (not implemented in the French GGS)

IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c_*w and b204c_*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint_st and bint_pr.

FIRST DATASET RELEASED: V.1.0. (November 2012).

Processing Checks

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 1453 variable(s)

File GGS_Wave2_France_V.1.3.							
#	Name	Label	Type	Format	Valid	Invalid	Question
1	bint_pr	Presence of others at interview (W2)	discrete	numeric-1.0	6533	0	Other persons present at the start of interview

Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-] [Mean=1 /-] [StdDev=0.628 /-]
Definition	Standardized weight based on the country specific population weight.

File : GGS_Wave2_France_V.1.3.

bweight_1501: Country specific population weight (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1138.28845355364-67898.6198924764] [Missing=*]
Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-] [Mean=6698.631 /-] [StdDev=4205.028 /-]
Definition	Country-specific weight. Country specific population weight for FRA. Weighted by age, sex, citizenship, social and occupational status, type of household, number of household members, urbanization.

bmonth: Mnth of interview (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-]
Definition	Q 001
Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...
Interviewer's instructions	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

bnumbiol: Total number of biological children (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*/96]
Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	The number of biological children of the respondent (with the current or with former partner). For resident children, copied from the Household grid (code 2 or 3 on variable bhg3); for non-resident children, copied from question 211 (code 1 on variable b213). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		1850	28.3%
1		1196	18.3%
2		2003	30.7%
3		1001	15.3%

bnumstep: Total number of stepchildren (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-8] [Missing=*/96]
Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	For resident step children, copied from the Household grid (code 4 on variable bhg3); for non-resident step children, copied from step children grid (if variable b229_1...b229_10 is not empty or, in case variables b229_1...b229_10 are missing, if variable b231_1...b231_10 are not empty). As in wave 2 questionnaire step children grid only concerns Rs who are living with a partner that is NOT the same as the one in Wave 1, in the calculation of bnumstep variable numstep from Wave 1 was merged.

File : GGS_Wave2_France_V.1.3.

bnnumworkstatuses: The number of non-empty slots in the Activity and Education History grid (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-26] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=6533 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801 (variables bn871_*).
Pre-question	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104
Literal question	Which of the items on the card best describes what have you mainly been doing since age 16?
Notes	The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

Value	Label	Cases	Percentage
1		176	2.7%
2		1305	20.0%
3		1248	19.1%
4		1318	20.2%
5		845	12.9%

# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=5179 /-] [Invalid=1354 /-] [Mean=53.62 /-] [StdDev=37.342 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=732 /-] [Invalid=5801 /-] [Mean=209.093 /-] [StdDev=153.75 /-]

# bndursselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)			
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurhelpfamstatuses: Total duration (in month) of Rs working statuses as helping family member in a f (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-677] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=402 /-] [Invalid=6131 /-] [Mean=131.505 /-] [StdDev=139.755 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16 (code 4 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-660] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1707 /-] [Invalid=4826 /-] [Mean=115.582 /-] [StdDev=82.056 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as retired since age 16 (code 6 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurhomestatuses: Total duration (in month) of Rs working statuses as homemaker since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1249 /-] [Invalid=5284 /-] [Mean=180.143 /-] [StdDev=178.048 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as homemaker since age 16 (code 8 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long t (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=422 /-] [Invalid=6111 /-] [Mean=68.45 /-] [StdDev=84.595 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16 (code 11 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=1579 /-] [Invalid=4954 /-]
Definition	Derived variable from Q 117.
Universe	If R's address has changed between the waves
Literal question	In what month and year did you start living in this [type of accommodation]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b150AgeR: R's age of achieving the current education level (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=6113 /-] [Invalid=420 /-]		
Definition	Derived variable from Q 114.		
Literal question	In what month and year did you reach that level?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b201a_a: HH tasks with children: Dressing (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=*/97/98/99]		
Statistics [NW/ W]	[Valid=274 /-] [Invalid=6259 /-]		
Definition	Q 201.a.a. DEU: 6 specific items "1401- usually R", "1402 - R and Partner about equally", "1403 - usually partner", "1404 - usually other persons in the household", "1405 - usually someone not living in the house", "1406 - children do it themselves".		
Universe	If children younger than 14 are present in the household.		
Pre-question	I'm going to read out various tasks that have to be done when one lives together with children. Please tell me, who in your household does these tasks? Choose your answer from the card: Card 201-1 if a partner is present in the household; Card 201-2 if no partner is present.		
Literal question	Dressing the children or seeing that the children are properly dressed		
Interviewer's instructions	Start asking item by item from the table below. If the answer is 6 "Always or usually other persons in R's household", ask question 201b before proceeding to the next item.		
Value	Label	Cases	Percentage
1	always R	57	20.8%
2	usually R	18	6.6%
3	R and Partner about equally	26	9.5%

Information	[Type= discrete] [Format=numeric] [Range= 10-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=484 /-] [Invalid=6049 /-]
Definition	Derived variable from Q 330.
Universe	If R has a non-resident partner (code 1 on Q 325).
Literal question	In what month and year was your partner/spouse born?
Notes	Partner's time of birth was taken from b315y and b315m. If information on partner's month of birth / month was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b374cAgeP: Partner's age of obtaining permanent residence (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=469 /-] [Invalid=6064 /-]		
Definition	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).		
Universe	If R has a partner (co-resident or non-resident)		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b5116AgeR: R's age of first time living separately from parents >= 3 mnths (W2)	
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=6257 /-] [Invalid=276 /-]
Definition	Derived variable from Q 544
Universe	If R does not currently live with parents/a parent ITA: Only asked to respondents younger than 43 years old
Literal question	In what month and year did you for the first time start living separately from your parents for at least three months?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when first time living separately from parents was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b871AgeR: R's age at start of current activity status (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=6282 /-] [Invalid=251 /-]		
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)		
Literal question	In what month and year did you start this job or business?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Definition	Derived variable from Q 806		
Universe	If code 3 on Q 805 (variable bn875_1 ... bn875_*)		
Literal question	When did the first/next period of part time work start?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".		

# bn876_19AgeR: R's age at the start of part time (W2)			
Value	Label	Cases	Percentage

Definition	Derived variable from Q 807		
Universe	If code 3 on Q 805 (variable bn875_1 ... bn875_*)		
Literal question	When did this period of part time work end?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when ended part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Definition	Derived variable from Q 809		
Universe	If code 3 on Q 805 (variable bn875_1 ... bn875_*)		
Literal question	(If there were more subsequent periods:) When did the last period of part time work end?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when ended last part time was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".		
Value	Label	Cases	Percentage
35		1	<div></div> 33.3%
52		1	<div></div> 33.3%
57		1	<div></div> 33.3%

# b917: Partner's last occupation (see code ISCO) (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 1-9993] [Missing=*/9997/9998/9999]		
Statistics [NW/ W]	[Valid=1468 /-] [Invalid=5065 /-]		
Definition	Q 1017		
Universe	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.		

b917: Partner's last occupation (see code ISCO) (W2)

Pre-question I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.

Literal question What was his/her last occupation? Please describe the principal activity he/she performed.

b1001_a: Possession hh appliance: Color TV (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-1801] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=6532 /-] [Invalid=1 /-]
Definition	Q 1101.a
Pre-question	In the following I would like to talk with you about the financial situation of your household – about the things your household possesses and can afford as well as the income and transfers your household receives. Please look at this list. For each item, please indicate whether or not your household possesses it. It does not matter whether the item is owned, rented, or otherwise provided for your use. If you do not have an item, please indicate whether you would like to have it but cannot afford it, or do not have it for other reasons, e.g. you don't want or need it. Card 1101.
