Generations and Gender Survey Germany-Turkish subsample Wave 1 & Wave 2 (GGS Germany-Turkish subsample Wave 1 & Wave 2) *Generationenbeziehungen und Rollenverteilungen*

Overview	
Identification	GGS.W1.W2.14.51
<p>Abstract</p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2006-2010
Countries	Germany
<p>Geographic Coverage</p> <p>Whole Germany.</p>	
<p>Universe</p> <p>WAVE 1</p> <p>Turkish nationals registered and residing in Germany in 2006, aged 18 to 79 and living in private household in Germany.</p> <p>WAVE 2</p> <p>Persons who took part in Wave 1 and expressed a willingness to be re-contacted, who lived in private households in 2006, were aged between 18 and 79 at the time of the interview and had Turkish nationality.</p>

Sampling
<p><u>Sampling Procedure</u></p> <p>WAVE 1 SAMPLING PROCEDURE</p> <p>1. Sampling frame</p> <p>1.1 Type of frame: The frame is set on information of local immigration authorities and base data originate from the Federal Register of Foreigners.</p> <p>1.2 Frame coverage: NA</p> <p>1.3 Frame size: NA</p> <p>1.4 Level of units available: NA</p> <p>2. Sampling method</p> <p>2.1 Sampling method type: Three-tier procedure was selected in order to obtain a random sample: 1) local immigration authorities; information at the level of the districts, used in order to estimate the number of respondents at municipality level; basis for this was the share of the total population in the municipality as against the total population in the district (base data originate from the Federal Register of Foreigners (as per: 30 September 2005)); 2) each municipality in Germany was allocated a significance weight for the sampling at municipality level; sample selection of the municipalities was carried out with significance weight; 3) in the residents registration offices of the municipalities which were drawn, a random selection of respondents took place; municipalities in which insufficient number or no Turkish nationals live were removed from the sample.</p> <p>2.2 Sampling stage definition</p> <ul style="list-style-type: none"> - PSU: Sample points / municipalities. - SSU: Addresses per point. - TSU: NA <p>2.3 Sampling stage size</p> <ul style="list-style-type: none"> - PSU: 400 sample points (93 municipalities). - SSU: 30 addresses per point (=gross estimate 12,000). - TSU: NA <p>2.4 Unit selection: NA</p> <p>2.5 Final stage unit selection: NA</p> <p>2.6 Within Household unit selection: NA</p> <p>2.7 Stratification: NA</p> <p>2.8 Sample size</p> <ul style="list-style-type: none"> - Starting size sample: 11,876. - Aimed total size at Wave 1: 4,045. - Aimed total size at Wave 3: NA <p>2.9 Estimated Non-response</p> <ul style="list-style-type: none"> - Initial non-response: 7,681. - Yearly attrition: From wave 1 to wave 2 around 3/4 (75%). - Non response measures: None. - Within household non-responses measures: NA <p>WAVE 2 SAMPLING PROCEDURE: same population than Wave 1 who had agreed to be re-contacted, i.e. n=2,602 respondents.</p> <p><u>Response Rate</u></p> <p>WAVE 1</p> <p>Response rate - Final disposition codes:</p>

I = complete interview: 4,045
 P = partial interview: NA
 NE = non-eligible : 2,015 + 150 (interviews carried out)
 NC = non-contact : 3,127
 R = refusal: 2,901
 O = other non-response: 1,652
 UC = unknown eligibility, contacted: NA
 UC = unknown eligibility, non-contact: NA
 eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA
 eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

WAVE 2

Response rate - Final disposition codes:

I = complete interview: 1,033 (of which 35 interviews had to be removed due to wrong respondent surveyed. HENCE: 998 interviews)

P = partial interview: DK

NE = non-eligible: 47

NC = non-contact: 605

R = refusal: 641

O = other non-response: 210

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Weighting

WAVE 1 WEIGHTING

Yes, two weighting variables, household and personal weight. Procedure: The overall sample was adjusted to the target structures of the characteristics Federal Land, age groups, sex and education known from the official statistics. The publication of the Federal Statistical Office served as a data basis. The margin weighting by Federal Land and municipality size class (BIK) was based on an estimate based in turn on the information from the Federal Register of Foreigners at the level of the local immigration authorities.

WAVE 2 WEIGHTING

Same procedure as for the second wave of the German sample. The method applied is the consecutive factor weightings, which allows to compensate for the distortions that may arise from drop-outs at the second wave. Three weighting variables have been calculated: 1) bweight_1402: longitudinal weight. The realised sample of the second wave was adjusted to the same target structures for the weighting of the second wave. The information on those who were re-contacted as to Federal State, age group, sex and BIK from the first survey wave formed the basis for this weighting. The official data basis is hence once more the target structure of the first weighting. 2) bweight_1401: Cross-sectional weighting. In addition to a longitudinal weighting of the drop-out processes, an adjustment of the structures was carried out in 2009 using reference data. In order to reach a cross-sectional weighting for the second survey time, an adjustment was carried out to the current structures on the longitudinal factors described above. 3) bweight: standardised weight.

Data Collection

Data Collection Dates	Wave 1: start 2006-05-15 Wave 1: end 2006-11-09 Wave 2: start 2009-09-15 Wave 2: end 2010-02-15
Data Collection Mode	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)

Data Collection Notes

WAVE 1 DATA COLLECTION

1. Interviewers

- 1.1 Total number of interviewers: 321.
- 1.2 Number of interviewers in the field: NA
- 1.3 Network organization: Centralized network with 6 regions being coordinated from TNS infratest. Local field coordinators were responsible for the fieldwork conducted within the region.
- 1.4 Working arrangement of interviewers: Part-time.
- 1.5 Payment of interviewers: Paid per interview (successful contact).
- 2. Interviewer training:
 - 2.1 General interviewing: Not for this project but in general with training materials distributed by central network and training conducted locally by field coordinators.
 - 2.2 Survey specific: Yes, by sending written interviewer instruction before fieldwork started.
 - 2.3 Length: 1 hour.
 - 2.4 Control of performance: For randomly selected 10% of the interviews postcards with some questions about fieldwork (e.g. length of interview) were sent to the respondent. In case of questionable interviews the whole work (100%) of the interviewer was controlled.
 - 2.5 Interviewer survey: No.
- 3. Contact protocols
 - 3.1 Advance letter: Yes, interviewers could make use of a general contact letter as soon as they contacted the household.
 - 3.2 Cold contacts: Face-to-face.
 - 3.3 Scheduling / scattering: Yes, interviewers were entitled to scatter contact attempts by making sure that more than 50% of contact attempts were in the afternoon of week-days or on week-ends.
 - 3.4 Contact history: No.
 - 3.5 Min number of contacts: 4.
 - 3.6 Max number of contacts: No.
- 4. Questionnaire localization
 - 4.1 Validation: No.
 - 4.2 Pre-test: Yes, with 50 persons; normal survey rules using the CAPI software. Country-specific response categories were used for questions on e.g., education and occupation. 6 additional country-specific questions were added as compare to the harmonised questionnaire. These questions concern family policy measures, fertility intentions and abortion.
 - 4.3 Length of interview: Average length of interview: 73 minutes, with wide range (minimum 37 minutes, maximum 185 minutes) according to the composition of the household and the biography of the respondent.

WAVE 2 DATA COLLECTION

- 1. Interviewers
 - 1.1 Total number of interviewers: 197.
 - 1.2 Number of interviewers in the field: DK
 - 1.3 Network organization: Centralized network coordinated from TNS infratest.
 - 1.4 Working arrangement of interviewers: Interviewers deployment followed the principle that the same interviewers were deployed again for the follow-up questionnaire wherever this was possible and meaningful.
 - 1.5 Payment of interviewers: DK
- 2. Interviewer training:
 - 2.1 General interviewing: Yes
 - 2.2 Survey specific: The interviewers were trained using written training material which contained both the objectives of the study, the nature of the selection process and information on individual difficult complexes of questions.
 - 2.3 Length: DK
 - 2.4 Control of performance: Routine postcard checks in 10% of all interviews conducted. As soon as abnormalities emerge, this triggers a check of all interviews conducted by the interviewer in question. Follow-up visits are also carried out by contact interviewers in ambiguous cases, in addition to postcard checks.
 - 2.5 Interviewer survey: DK
- 3. Contact protocols
 - 3.1 Advance letter: Prior to the questioning by the interviewers, the respondents received a centrally-dispatched letter informing them of the coming questionnaire.

- 3.2 Cold contacts: NO
- 3.3 Scheduling / scattering: DK
- 3.4 Contact history: DK
- 3.5 Min number of contacts: DK
- 2.6 Max number of contacts: DK

4. Questionnaire localization

- 4.1 Validation: No.
- 4.2 Pre-test: No. The computer-aided questionnaire program was taken over from the main GGS survey conducted on the German sample, which had been tested in detail by Infratest and the BIB prior to the field phase.
- 4.3 Length of interview: Average length of interview: 69 minutes , with wide range (minimum 29 minutes, maximum 142 minutes) according to the composition of the household and the biography of the respondent. As had already been the case in the first survey wave, interviews in which the Turkish translations were used, at an average of 88 minutes, were much longer than those which were conducted in German(65 minutes).

Questionnaires

Structured questionnaire in German and Turkish translation aid (used if respondent was not able to understand the German question).

Data Collector(s)	TNS Infratest
--------------------------	---------------

Supervision

WAVE 1 ACTIONS

- 1. Dealing with nonresponse
 - 1.1 Screening: No.
 - 1.2 Refusal conversion: No specific training for this project only general training.
 - 1.3 Incentives: Money.

2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (not email-addresses).
- 2.2 Other contact information:
- 2.3 Cards: A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents (planned frequency of contacts with the respondents between the two waves: 3). Furthermore, a brochure with results of Wave 1 was sent.
- 2.4 Additional surveys: No.
- 2.5 Administrative records: NA

WAVE 2 ACTIONS

- 1. Dealing with nonresponse
 - 1.1 Screening: Yes. In addition to annual contacts, enquiries were also made to the residents' registration offices with regard to those individuals where our letters were returned by the post office and where the ensuing postal enquiries did not provide a valid address.
 - 1.2 Refusal conversion: DK
 - 1.3 Incentives: The participants in the sub-sample received € 10 from the interviewer as an incentive. The participants were informed about this in the advance letter.

2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (not email-addresses).
- 2.2 Other contact information: Yes.
- 2.3 Cards: Regular panel maintenance was carried out in the interim period by TNS Infratest. A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents (planned frequency of contacts with the respondents between the two waves: 3). Furthermore, a brochure with results of Wave 1 was sent.
- 2.5 Administrative records: Yes (Einwohnermeldeamt)

The survey was carried out in the period from mid-September 2009 to mid-February 2010. A fieldwork time of three months to mid-December 2009 had originally been planned. Because of the n=884 interviews that had been carried out by mid-December and of a relatively promising share among those who were not reached, TNS Infratest Sozialforschung decided to invest in additional, unplanned post-processing. This post-processing contributed important additional interviews, so that a total of n=1,033 questionnaires had been carried out by mid-February 2010.

Data Processing & Appraisal

Data Editing

WAVE 2 CLEANING OPERATIONS

The main cleaning operations were: a) Editing of raw data and pre-harmonization: Renaming all variables names, (Re-)Translating all labels from German to English, Recoding variables if structure differed from the harmonization standard, Checking and coding of user missing values and system missing values, Checking of consistency of filters, Coding of basic information on education into ISCED-97 and occupation into ISCO-88

b) Checks for inconsistent results and logical consistency: checking the internal plausibility (e.g. household roster, dates), plausibility between survey waves (e.g. sex and year of birth)

If possible corrections have been conducted. Otherwise cases or responses had been removed or documented. For more details and results: Naderi et al. 2012. http://www.bib-demografie.de/SharedDocs/Publikationen/DE/Materialien/121d.pdf?__blob=publicationFile&v=3

Files Description

Dataset contains 1 file(s)

GGG_Wave2_Germany_Turkish_subsample_V.1.3.	
# Cases	997
# Variable(s)	1182
File Structure	Type: relational Key(s): arid (R identification number (W2))
<p><u>File Content</u> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> - Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc , , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl , bhhtype. - Variables derived from month and year variable: b121AgeR, b150AgeR , bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, 	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.

- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.

- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.

- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (March 2013).

Processing Checks

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 1182 variable(s)

File GGS_Wave2_Germany_Turkish_subsample_V.1.3.							
#	Name	Label	Type	Format	Valid	Invalid	Question

bmonth: Mnth of interview (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Q 001
Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...
Interviewer's instructions	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous marriages that ended in divorce between wave 1 and wave 2. For marriages present at wave 1: code 1 on question 302 or 303 AND code 2 on question 312, "Partnership history" grid. For marriages started after wave 1: code 1 on question 310 AND code 2 on question 312, "Partnership history" grid.

Value	Label	Cases	Percentage
0		972	97.5%
1		25	2.5%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnumdivorce: Total number of partnerships ending in divorce (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The total number of marriage dissolutions reported at wave 1 (variable numdivorce at wave 1) PLUS the marriage dissolutions between the two waves (variable bnnumdivorce). Note that this variable only refers to resident partners.

Value	Label	Cases	Percentage
0		899	90.2%

File : GGS_Wave2_Germany_Turkish_subsample_V.1.3.

bnumdivorce: Total number of partnerships ending in divorce (W2)

Value	Label	Cases	Percentage
1		90	9.0%
2		8	0.8%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

blivingwithpartner: Respondent is living with their current partner (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*/6]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent's partner is present in the Household grid; "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	725	72.7%
2	No	272	27.3%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnrespartafterw1: Starting living with current partner after {wave 1} (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*/96]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent started living with current partner after wave 1 (code 1 on question 312 "Partnership history" grid); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	38	3.8%
2	No	959	96.2%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnnummarriage: Number of marriages since {wave 1} (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The marriages that occurred between wave 1 and wave 2 (code 1 on question 303 or question 310). Note that this variable only includes marriages with co-resident partners, and it does not include marriages present at wave 1.

Value	Label	Cases	Percentage
0		972	97.5%
1		24	2.4%
2		1	0.1%
96	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

bnummarriage: Total number of marriages (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*/96]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable

File : GGS_Wave2_Germany_Turkish_subsample_V.1.3.

bnummarriage: Total number of marriages (W2)

Notes	The total number of marriages reported at wave 1 (variable nummarriage at wave 1) PLUS the marriages between the two waves (variable bnummarriage). Note that for wave 1 this variable includes marriages with co-resident as well as non-resident partners, whereas for wave 2 it only refers to marriages with co-resident partners.
--------------	---

Value	Label	Cases	Percentage
0		215	21.6%
1		746	74.8%
2		32	3.2%

bnnumworkstatuses: The number of non-empty slots in the Activity and Education History grid (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-26] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]
Definition	Derived variable from Q 801 (variables bn871_*).
Pre-question	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104
Literal question	Which of the items on the card best describes what have you mainly been doing since age 16?
Notes	The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

Value	Label	Cases	Percentage
1		225	22.6%
2		268	26.9%
3		190	19.1%
4		127	12.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# bnnumboth: The number of R's working statuses that have changed from part-time to full-time (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=997 /-] [Invalid=0 /-]		
Definition	Derived variable from Q 805 (variables bn875_*).		
Literal question	Was it full time or part time?		
Notes	The number of R's working statuses that have changed from part-time to full-time (or the other way around) since age 16 (code 3 on Q 805, variables bn875_*).		

# bnnumboth: The number of R's working statuses that have changed from part-time to full-time (W2)			
Value	Label	Cases	Percentage
0		953	<div></div> 95.6%
1		43	<div></div> 4.3%
2		1	<div></div> 0.1%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*997/998/999]		
Statistics [NW/ W]	[Valid=481 /-] [Invalid=516 /-] [Mean=77.807 /-] [StdDev=62.694 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bnduremplstatuses: Total duration (in month) of Rs working statuses as employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=667 /-] [Invalid=330 /-] [Mean=63.397 /-] [StdDev=110.248 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurhomeststatuses: Total duration (in month) of Rs working statuses as homemaker since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=262 /-] [Invalid=735 /-] [Mean=20.511 /-] [StdDev=53.912 /-]		

# bndurhomestatuses: Total duration (in month) of Rs working statuses as homemaker since age 16 (W2)			
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as homemaker since age 16 (code 8 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# b374cAgeP: Partner's age of obtaining permanent residence (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=517 /-] [Invalid=480 /-]		
Definition	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).		
Universe	If R has a partner (co-resident or non-resident)		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b871AgeR: R's age at start of current activity status (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=491 /-] [Invalid=506 /-]
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)
Literal question	In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b914AgeP: Partner's age of becoming a homemaker (W2)			
Definition	Derived variable from Q 1014		
Universe	If code 8 on Q 1001		
Literal question	Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month of becoming a homemaker was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".
