# Generations and Gender Survey Germany Wave 1 & Wave 2 (GGS Germany Wave 1 & Wave 2)

## *Generationenbeziehungen und Rollenverteilungen*

Overview	
<b>Identification</b>	GGS.W1.W2.14
<p><b>Abstract</b></p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul>	
<b>Kind of Data</b>	Survey data
<b>Unit of Analysis</b>	Individuals

Scope & Coverage	
<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<b>Time Period(s)</b>	2005-2009
<b>Countries</b>	Germany
<p><b>Geographic Coverage</b></p> <p>Whole Germany.</p>	
<p><b>Universe</b></p> <p>WAVE 1</p> <p>German speaking persons aged 18 to 79 living in private household in Germany.</p> <p>WAVE 2</p> <p>Persons who took part to Wave 1 and who declared to be willing to be re-contacted for Wave 2.</p>

<b>Sampling</b>
<p><b><u>Sampling Procedure</u></b></p> <p><b>WAVE 1 SAMPLING PROCEDURE</b></p> <p>1. Sampling frame</p> <p>1.1 Type of frame: So-called ADM-Master sample (as at December 2002), which divides Germany on the basis of GIS in 53,000 sample-points.</p> <p>1.2 Frame coverage:</p> <p>1.3 Frame size:</p> <p>1.4 Level of units available:</p> <p>2. Sampling method</p> <p>2.1 Sampling method type: Random route survey according to the ADM design: 1) all municipalities of the survey territory are divided into layers by regional criteria (Laender, administrative districts, municipality types (population size)) - those sample points are sub-divided proportionately to the number of households in the layers (cells); with the aid of a geographical information system (GIS) streets are roughly sub-divided into 53,000 areas; The sample points defined by these means are exclusively at the disposal of the ADM member institutes in the form of the so-called ADM sample networks; total of 1,475 sample points were selected in this first step; 2) household addresses needed for the sample were collected by random selection; interviewers deployed are set a starting address which can be defined per sample point and using a precisely-defined route; 3) the interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).</p> <p>2.2 Sampling stage definition</p> <ul style="list-style-type: none"> <li>- PSU: Sample points.</li> <li>- SSU: Addresses per point.</li> <li>- TSU: NA</li> </ul> <p>2.3 Sampling stage size</p> <ul style="list-style-type: none"> <li>- PSU: 1,475 sample-points.</li> <li>- SSU: 14 addresses per point (=gross estimate 20,650).</li> <li>- TSU: NA</li> </ul> <p>2.4 Unit selection: NA</p> <p>2.5 Final stage unit selection: NA</p> <p>2.6 Within Household unit selection: The interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).</p> <p>2.7 Stratification: NA</p> <p>2.8 Sample size: NA</p> <ul style="list-style-type: none"> <li>- Starting size sample: 18,123.</li> <li>- Aimed total size at Wave 1: 10,017.</li> <li>- Aimed total size at Wave 3:</li> </ul> <p>2.9 Estimated Non-response</p> <ul style="list-style-type: none"> <li>- Initial non-response: 8,079.</li> <li>- Yearly attrition: Wave 1 to wave 2 around 2/3 (67%).</li> <li>- Non response measures: None.</li> <li>- Within household non-responses measures: NA</li> </ul>

**WAVE 2 SAMPLING PROCEDURE:** same population than Wave 1 who had agreed to be re-contacted, i.e. n=6,409 respondents.

### **Response Rate**

#### **WAVE 1**

Response rate - Final disposition codes:

I = complete interview: 10,017

P = partial interview: NA

NE = non-eligible : 2,527 (1,320 "No person in the target group", 1,207 "other sample-neutral failures") + 27 (Carried out interviews)

NC = non-contact : 1,948

R = refusal: 5,134

O = other non-response: 997

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

#### **WAVE 2**

Response rate - Final disposition codes:

I = complete interview: 3,285 (of which 58 interviews had to be removed due to wrong respondent surveyed. Hence, the number of complete interviews is: 3227)

P = partial interview: NA

NE = non-eligible: 72

NC = non-contact: 716

R = refusal: 1,091 (unwillingness to participate) + 457 (lack of time)=1548

O = other non-response: 201 (respondents ill) + 17 (language problems) + 212 (other non-response)=430

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

### **Weighting**

#### **WAVE 1 WEIGHTING**

Yes, two weighting variables, household and personal weight. Procedure: 1) household sample was weighted, both by Federal Länder and municipality size classes (BIK) and by household size. This level corrects deviations from the original sample approach proportionate to the household; 2) overall sample was now adjusted to the target structures of the characteristics Federal Land, age groups, sex and education known from the official statistics (Mikrozensus 2003); 3) In a final weighting level, the additional qualitative improvements achieved by the person weighting in the sample were projected back to the household sample, so that evaluations of household characteristics now also show the same degree of representation as person-weighted ones.

#### **WAVE 2 WEIGHTING**

The sample that had been achieved in the second wave was adjusted to the same target structures than Wave 1. The information provided by those who were resurveyed on Federal Länder, age groups, sex and education from the first survey wave were used as a basis for this weighting. The official data basis for the characteristics Federal Länder, age groups and sex was formed by the population extrapolation of the Federal Statistical Office (2003). The information from the Microcensus 2003 was also once more used as a set of reference statistics for the margin weighting according to East/West, age groups and education.

### **Data Collection**

<b>Data Collection Dates</b>	Wave 1: start 2005-02-22 Wave 1: end 2005-05-12 Wave 2: start 2008-09-15
------------------------------	--

	Wave 2: end 2009-03-30
<b>Data Collection Mode</b>	Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI)
<b>Data Collection Notes</b> <b>WAVE 1 DATA COLLECTION</b> 1. Interviewers 1.1 Total number of interviewers: 528. 1.2 Number of interviewers in the field: NA 1.3 Network organization: Centralized network with 6 regions being coordinated from TNS infratest. Local field coordinators were responsible for the fieldwork conducted within the region. 1.4 Working arrangement of interviewers: Part time. 1.5 Payment of interviewers: Paid per interview (successful contact).  2. Interviewer training: 2.1 General interviewing: Not for this project but in general with training materials distributed by central network and training conducted locally by field coordinators. 2.2 Survey specific: Yes, by sending written interviewer instruction before fieldwork started. 2.3 Length: 1 hour. 2.4 Control of performance: For randomly selected 10% of the interviews postcards with some questions about fieldwork (e.g. length of interview) were sent to the respondent. In case of questionable interviews the whole work (100%) of the interviewer was controlled. 2.5 Interviewer survey: No.  3. Contact protocols 3.1 Advance letter: No. 3.2 Cold contacts: Face-to-face. 3.3 Scheduling / scattering: Yes, interviewers were entitled to scatter contact attempts by making sure that more than 50% of contact attempts were in the afternoon of week-days or on week-ends. 3.4 Contact history: No. 3.5 Min number of contacts: 4. 3.6 Max number of contacts: No.  4. Questionnaire localization 4.1 Validation: No. 4.2 Pre-test: One pre-test carried out using CAPI version of the questionnaire in winter 2004/05 (115 respondents). Country-specific response categories were used for questions on e.g., education and occupation. 6 additional country-specific questions were added as compare to the harmonised questionnaire. These questions concern family policy measures, fertility intentions and abortion. 4.3 Length of interview: Average length of interview: 57 minutes, with wide range (minimum 27 minutes, maximum 164 minutes) according to the composition of the household and the biography of the respondent.  <b>WAVE 2 DATA COLLECTION</b> 1. Interviewers 1.1 Total number of interviewers: 404. 1.2 Number of interviewers in the field: DK 1.3 Network organization: Centralized network coordinated from TNS infratest. 1.4 Working arrangement of interviewers: Interviewers deployment followed the principle that the same interviewers were deployed again for the follow-up questionnaire wherever this was possible and meaningful. All in all, the same interviewer as in 2005 was only deployed with somewhat more than half the respondents.  2. Interviewer training: DK  3. Contact protocols 3.1 Advance letter: Yes - shortly before starting the fieldwork in 2008 3.2 Cold contacts: NO.	

- 3.3 Scheduling / scattering: DK
- 3.4 Contact history: DK
- 3.5 Min number of contacts: DK
- 2.6 Max number of contacts: DK

#### 4. Questionnaire localization

- 4.1 Validation: No.
- 4.2 Pre-test: CAPI questionnaire was tested in the pilot which was carried out in July 2008 on 31 respondents.
- 4.3 Length of interview: Average length of interview: 59 minutes , with wide range (minimum 32 minutes, maximum 107 minutes) according to the composition of the household and the biography of the respondent.

#### **Questionnaires**

Structured questionnaire in German.

<b>Data Collector(s)</b>	TNS Infratest
--------------------------	---------------

#### **Supervision**

##### WAVE 1 ACTIONS

- 1. Dealing with nonresponse
  - 1.1 Screening: No.
  - 1.2 Refusal conversion: No specific training for this project, only general training
  - 1.3 Incentives: Yes, lottery ticket amounting to 10 €.

##### 2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.
- 2.2 Other contact information: DK
- 2.3 Cards: A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents (planned frequency of contacts with the respondents between the two waves: 3). Furthermore, a brochure with results of Wave 1 was sent.
- 2.4 Additional surveys: No
- 2.5 Administrative records: NA

##### WAVE 2 ACTIONS

- 1. Dealing with nonresponse
  - 1.1 Screening: Yes. The sending of letters between the two waves provided a chance to check for potentially changing addresses on a yearly basis. In addition to annual contacts, enquiries were also made to the residents' registration offices with regard to those individuals where our letters were returned by the post office and where the ensuing postal enquiries did not provide a valid address.
  - 1.2 Refusal conversion: DK
  - 1.3 Incentives: In order to achieve as high a response rate as possible, the respondents who had given an interview received as an incentive a ticket for the ARD television lottery by post following their participation.

##### 2. Tracking of sampled units

- 2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.
  - 2.2 Other contact information: DK
  - 2.3 Cards: Regular panel maintenance was carried out in the interim period by TNS Infratest. A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents willing to be re-contacted. Also the so called GGP-Journal in the first 2 years (end of 2005 and 2006) was sent. Two letters announcement of the beginning of the next wave at the end of 2007 and in 2008.
  - 2.4 Additional surveys: No
  - 2.5 Administrative records: Yes (Einwohnermeldeamt)
- A field-work time of three months from mid-September 2008 to mid-December 2008 had originally been planned. Because only n=3,018 interviews that had been carried out by the end of December and because of a relatively promising share among those who were not reached, TNS Infratest Sozialforschung decided to invest in additional, unplanned post-processing. A total of n=3,285 questionnaires had been carried out by the end of March 2009.

## Data Processing & Appraisal

### Data Editing

#### WAVE 2 CLEANING OPERATIONS

The main cleaning operations were:

a) Editing of raw data and pre-harmonization: Renaming all variables names, (Re-)Translating all labels from German to English, Recoding variables if structure differed from the harmonization standard, Checking and coding of user missing values and system missing values, Checking of consistency of filters, Coding of basic information on education into ISCED-97 and occupation into ISCO-88.

b) Checks for inconsistent results and logical consistency: checking the internal plausibility (e.g. household roster, dates), plausibility between survey waves (e.g. sex and year of birth)

If possible corrections have been conducted. Otherwise cases or responses had been removed or documented.

For more details and results: Sauer et al. 2012: [http://www.bib-demografie.de/SharedDocs/Publikationen/DE/Materialien/121c.pdf?\\_\\_blob=publicationFile&v=8](http://www.bib-demografie.de/SharedDocs/Publikationen/DE/Materialien/121c.pdf?__blob=publicationFile&v=8).

# Files Description

Dataset contains 1 file(s)

<b>GGG_Wave2_Germany_V.1.3.</b>	
<b># Cases</b>	3226
<b># Variable(s)</b>	1212
<b>File Structure</b>	Type: relational Key(s): arid (R identification number (W2))
<p><b><u>File Content</u></b> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Version</u></b> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> <li>- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.</li> <li>- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP,</li> </ul>	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.
- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

**IMPROVEMENTS INTRODUCED WITH V.1.2.** in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

**IMPROVEMENTS INTRODUCED WITH V.1.1.** (March 2013):

- Variables corrected: b510 b530 b626.
- Changes in the variable/value labels: b703b (value 5 previously without label; now value 5 recoded into missing, no valid answer), b906b (previously without labels, now with labels).
- Variables dropped because not part of the GGS Core Questionnaire: b257\* and b258\*.

**IMPROVEMENTS INTRODUCED WITH V.1.1.** in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c\_\*w and b204c\_\*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint\_st and bint\_pr.

**FIRST DATASET RELEASED:** V. 1.0. (November 2012).

### **Processing Checks**

**WAVE 2 DATA HARMONISATION:** see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

**WAVE 2 DATASETS** - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables

consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

#### WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Variables List

Dataset contains 1212 variable(s)

File GGS_Wave2_Germany_V.1.3.

<b>Definition</b>	Q 001
<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...

<b>Interviewer's instructions</b>	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

## # bmaleage: If partnered: age of male (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 11-96] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=2423 /-] [Invalid=803 /-] [Mean=52.811 /-] [StdDev=14.041 /-]
<b>Definition</b>	Derived variable from consolidated variable bage, bsex, b373y, b384.
<b>Universe</b>	If R has a partner
<b>Notes</b>	For a resident partner the age was copied from the Household grid; for a non resident partner the age was calculated as: year of interview MINUS question 333 (variable b315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable b315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=2336 /-] [Invalid=890 /-] [Mean=102.249 /-] [StdDev=81.009 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bnduremplstatuses: Total duration (in month) of Rs working statuses as employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=2900 /-] [Invalid=326 /-] [Mean=171.542 /-] [StdDev=188.771 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=339 /-] [Invalid=2887 /-] [Mean=69.413 /-] [StdDev=125.692 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information	[Type= discrete] [Format=numeric] [Range= 0-265] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3224 /-] [Invalid=2 /-]		
Definition	Derived variable from Q 805, Q 808 and Q 809 (variables bn875_*, bn878m_*, bn878y_*, bn879m_*, bn879y_*).		
Universe	If code 3 on Q 805		
Literal question	When did the last period of part time work start? When did the last period of part time work end?		
Notes	Duration (in month) of Rs last part-time (code 3 on Q 805, variable bn875_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=334 -/] [Invalid=2892 -/]		
Definition	Derived variable from Q 117.		
Universe	If R's address has changed between the waves		
Literal question	In what month and year did you start living in this [type of accommodation]?		

## # b121AgeR: R's age of starting to live in current dwelling (W2)

### Notes

R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b150AgeR: R's age of achieving the current education level (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3055 /-] [Invalid=171 /-]		
Definition	Derived variable from Q 114.		
Literal question	In what month and year did you reach that level?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Literal question	In what month and year was the oldest of your grandchildren born?		

## # b239aAgeR: R's age at birth of oldest grandchild (W2)

### Notes

R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of oldest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Definition	Q 234.b.		
Universe	If R has 1 grandchild AND if she/ he has had this only grandchild since first wave.		
Literal question	In what month and year was your grandchild born?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of only grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

### # b374cAgeP: Partner's age of obtaining permanent residence (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=221 /-] [Invalid=3005 /-]
<b>Definition</b>	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).
<b>Universe</b>	If R has a partner (co-resident or non-resident)
<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?
<b>Notes</b>	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b871AgeR: R's age at start of current activity status (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=2816 /-] [Invalid=410 /-]		
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)		
Literal question	In what month and year did you start this job or business?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Definition	Q 801  Country-specific additional values: - DEU: "1401-maternity/parental leave", "1402-employed or self-employed". - FRA: "1501-in apprenticeship or paid training", "1502-employed or self-employed". - GEO: "1301-on maternity leave, parental leave or child-care leave". - NLD: "1801-voluntary work or sabbatical".  - POL: only four types of working status recorded "1-student, in school, in vocational training", "2-employed", "3-self-employed", "4-helping family member in a family business or farm".		
Pre-question	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time!
