Generations and Gender Survey Norway Wave 1 (GGS Norway Wave 1)

Overview

Identification	GGSW1.20
<u>Abstract</u>	<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage

Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<u>Time Period(s)</u>	2007-2008
<u>Countries</u>	Norway
<u>Geographic Coverage</u>	Country representative.
<u>Universe</u>	Norwegian speaking persons aged 18-79 on December 31st 2006 living in private households in Norway, with an available phone number.

Producers & Sponsors

Primary Investigator(s)	Trude Lappegård, Statistics Norway

Sampling

Sampling Procedure

1. Sampling frame
 - 1.1 Type of frame: Population register.
 - 1.2 Frame coverage: Registered population of Norway.
 - 1.3 Frame size: Total registered population of Norway on December 31st 2006.
 - 1.4 Level of units available: Individuals.
2. Sampling method
 - 2.1 Sampling method type: Random probability sampling.
 - 2.2 Sampling stage definition
 - PSU: Regions (nuts 2).
 - SSU: Centrality.
 - TSU: Sex
 - FSU: Age
 - 2.3 Sampling stage size
 - PSU: 7
 - SSU: 2
 - TSU: 2
 - FSU: 3
 - 2.4 Unit selection: Random number generator from 78 strata.
 - 2.5 Final stage unit selection: Simple Random Sampling.
 - 2.6 Within Household unit selection: None.
 - 2.7 Stratification: NA
 - 2.8 Sample size
 - Starting size sample: 25,309.
 - Aimed total size at Wave 1: 11,995.
 - Aimed total size at Wave 3: 6,747.
 - 2.9 Estimated Non-response
 - Initial non-response: 35%.
 - Yearly attrition: 25%.
 - Non response measures: NA.
 - Within household non-responses measures: None.

Response Rate

Response rate - Final disposition codes:

I = complete interview: 15,114

P = partial interview: 42

NE = non-eligible: 479 respondents not interviewed due to death, emigration or institution, 264 respondents sorted out due to age limit (aged 80 years or older), 11 respondents sorted out due to anonymisation.

NC = non-contact: 2,186

R = refusal: 6,705

O = other non-response: 1,047

UC = unknown eligibility, contacted DK

UC = unknown eligibility, non-contact: DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: DK

Weighting

A weighting variable (aweight_2001) at the respondent level was built to reduce any non-response bias. The sample has been weighted according to the net sample. The variables used in the weights are sex, age, geographical region, centrality and education. The largest bias is related to education: those with primary education are somewhat underrepresented in the Norwegian GGS (5.5% difference between gross and net sample), whereas persons with college or university education are somewhat overrepresented (6.5% difference between gross and net sample).

The other weighting variable (aweight) is a standardized weight based on country specific population weight and it is recommended for use.

Data Collection

Data Collection Dates	start 2007-01-08 end 2008-09-15
Data Collection Mode	Method: Telephone interviews, self-administered postal interviews and use of register data. Technique: Web-assisted (CATI) for the telephone interview and Paper and Pencil (PAPI) for the self-administered postal.

Data Collection Notes

1. Interviewers
 - 1.1 Total number of interviewers: 223.
 - 1.2 Number of interviewers in the field: 1-223.
 - 1.3 Network organization: Centralized.
 - 1.4 Working arrangement of interviewers: Part-time.
 - 1.5 Payment of interviewers: Per hour.
2. Interviewer training:
 - 2.1 General interviewing: Yes, general interview techniques, CATI and general knowledge on surveys carried out by Statistics Norway survey department.
 - 2.2 Survey specific: Outline of the purpose of the study, the questionnaire, handling of sensitive questions and contact strategies.
 - 2.3 Length: One day specific training for the interview. All recruited interviewers were experienced and trained interviewers of Statistics Norway survey department.
 - 2.4 Control of performance: No.
 - 2.5 Interviewer survey: No.
3. Contact protocols
 - 3.1 Advance letter: Yes, each individual selected in the sample received an advanced letter introducing the survey and announcing the telephone call of an interviewer and the reason for his/her call, the survey subject, the agencies involved in the survey, the size of the survey. The letter included also information about the use of additional register data to facilitate the data collection and to reduce the interview time. The selected individuals were also invited to take contact if he/she had questions respective to the survey (free telephone number or by e-mail) or data privacy (contact information of the data protection officer). The letter included also a leaflet with information about the survey and two scale cards that could be used during the interview. Some of the information in the letter was adapted to the age of the selected individuals and if they were part of an earlier survey or not.
 - 3.2 Cold contacts: Telephone.
 - 3.3 Scheduling / scattering: Yes. To get the highest response rate, contact attempts were scattered over different days of the week and different parts of the day.
 - 3.4 Contact history: Yes. For each contact attempt the interviewer had to report the date, the time and the outcome grid.
 - 3.5 Min number of contacts: No.
 - 3.6 Max number of contacts: No.
4. Questionnaire localization
 - 4.1 Validation: No.

4.2 Pre-test: Two rounds with in-depth qualitative interviews (in total 19 interviews) using different parts of the questionnaire and different versions of the announcing letter were carried out in June and August 2006. A pilot of the telephone interview was carried out in December 2006 (150 respondents).

4.3 Length of interview: The average duration of interview was 43 minutes, with a large variance according to the composition of the household and the complexity of the family structure and history of the respondent.

Questionnaires

Structured questionnaire in Norwegian.

Data Collector(s)	Statistics Norway Survey department (SSB) , Statistics Norway
--------------------------	---

Supervision

1. Dealing with nonresponse

1.1 Screening: No.

1.2 Refusal conversion: No special methods - usual techniques of refusal avoidance, i.e. specify that personal information will remain confidential, offer to call for changing the time of interview, insistence of the research purpose.

1.3 Incentives: Yes. Among those completing both the telephone interview and sending back the self-administered postal interview, 7 individuals were drawn to win a gift voucher amounting to 10,000 NOK (approximately 1,250 Euro).

2. Tracking of sampled units

2.1 Respondent contact information: No.

2.2 Other contact information: No.

2.3 Cards: No.

2.4 Additional surveys: For a part of the panel sample the GGS is the second round. 7,861 individuals aged 40 years or older in 2002, participated already in 2002/03 in the "Norwegian Live Course Ageing and Generation Study", a quantitative survey, based on computer assisted telephone interviews on topics as ageing, health, work and retirement, family relations in the second half of the life and well-being.

2.5 Administrative records: Yes, whole sample is based on administrative records.

Data Processing & Appraisal

Data Editing

The datafile was checked and anonymized by Statistics Norway / NOVA before being sent to data harmonization.

Files Description

Dataset contains 1 file(s)

GGs_Wave1_Norway_V.4.3.	
# Cases	14880
# Variable(s)	1136
<p><u>File Content</u></p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u></p> <p>Harmonized dataset, GGS Wave1, version 4.3.</p> <p>IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):</p> <p>Variables corrected with Version 4.3.</p> <ul style="list-style-type: none"> - fertintent (no more ambiguous labelling) - a1101 (corrected error in coding) - aweight (now available also for NLD CZE SWE POL) - aregion (now available also for HUN) - aplace (now available also for HUN) - a5112 (corrected routing error for ROU) - a5113 (corrected routing error for ROU) - a5114 (corrected routing error for ROU) - a5115 (corrected routing error i for ROU) - a211b_ (corrected error for POL & GEO) - ankids (corrected error for POL & GEO) - a1008mnth (corrected error for NGR & BEL) - a108 (now available for SWE) - a109_1 (now available for SWE) - a109_2 (now available for SWE) - a149 (now available for SWE) - a309 (now available for SWE) - aregion (now available for SWE) - a620_ (corrected error for DEU & CZE) 	

- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256_ (corrected error for POL & GEO)

IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, ankids, a306, a309, a357, a365, a5106a_b, a5106a_s, a832.

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhsize ahhsize.

- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.

- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945.

- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627*, a628*, a629*, a631*, a383 (now rounded), a864*ff, a936*, a334m*, a5106_a, a5106_b

- New weight variables: aweight_2001 (country specific population weight), aweight (Standardized weight based on country specific population weight, recommended for use).

- Variables which do not have country specific categories anymore: a149 a309 a380 (coded using ISCED 97), a203b_* (coded into GGS values: "part time kindergarden" and "kindergarden" merged into "nursery", "relatives" dropped since this is information childcare, "no arrangement" into missing).

- Variables which have now country specific values: a203c_*

- Variables now available: a344y (now available also for widows/widowers).

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2010)

The individual income variables of the Respondent a866_* and the partner a938_* have been renamed into country specific variables a866_*_2000 and a938_*_2000, respectively. There are two deviations from the GGS Core Questionnaire for these variables. They are first, the annual and second, the gross amounts of payments for each income type.

For the Respondent (not the partner!) another country specific variable has been made available: a866_2000. This "after-tax income" is calculated as the sum of wages and salaries, income from self-employment, property income and transfers received minus total assessed taxes and negative transfers.

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

Variables List

Dataset contains 1136 variable(s)

File GGS_Wave1_Norway_V.4.3.

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=14880 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	<p>"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise.</p> <p>Data not available for Australia, Hungary, Estonia or Italy.</p>

Value	Label	Cases	Percentage
1	Yes	2690	18.1%
2	No	12190	81.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=5610 /-] [Invalid=9270 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	<p>This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)</p> <p>If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).</p> <p>Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p>

femeduc: If partnered: level of education of female

Information	[Type= discrete] [Format=numeric] [Range= 0-2147483624] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=5545 /-] [Invalid=9335 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	<p>This variable indicates the education level of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents education level is used (aeduc.)</p> <p>If the respondent is male and in a relationship with a female then their partners education level is derived depending on the nature of the relationship. For a resident partner the education level was copied from question 120 (variable a148) or question 304 (variable a308); for a non resident partner the education was copied from question 120 (variable a148) or question 313 (variable a321).</p> <p>Rs with non-resident partners are coded with "99 - not applicable/no response", when variable a321 is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p>

Value	Label	Cases	Percentage
0	iscd 0 - pre-primary education	1	0.0%
1	iscd 1 - primary level	665	12.0%
2	iscd 2 - lower secondary level	867	15.6%
3	iscd 3 - upper secondary level	1936	34.9%
4	iscd 4 - post secondary non-tertiary	109	2.0%
5	iscd 5 - first stage of tertiary	1939	35.0%
6	iscd 6 - second stage of tertiary	28	0.5%

numbiol: Total number of biological children

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
Statistics [NW/ W]	[Valid=14880 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3_*); for non-resident children, copied from question a213 (code 1 on variable a213_*). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		4162	28.0%
1		2001	13.4%

# a107AgeR: R's age of starting to live in country of interview			
Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=923 /-] [Invalid=13957 /-]		
Definition	Derived variable from Q 107 core questionnaire		
Universe	If code 2 on Q 105		
Literal question	In what month and year did you first start living permanently in [country]?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"</p> <p>Data is not available for Estonia.</p>

# a121AgeR: R's age of starting to live in current dwelling			
Information	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=13860 /-] [Invalid=1020 /-]		
Definition	Derived variable from Q 115 core questionnaire		
Literal question	In what month and year did you start living in this [type of accommodation]?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".</p> <p>Data is not available for Estonia.</p>

a301AgeR: R's age at start of living with current partner

Information	[Type= discrete] [Format=numeric] [Range= 1-74] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=9145 /-] [Invalid=5735 /-]
Definition	Derived variable from Q 301 core questionnaire
Universe	If R lives together with a partner
Literal question	In what month and year did you and he/she first start living together?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a303cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=572 /-] [Invalid=14308 /-]		
Definition	Derived variable from Q 303.c core questionnaire		
Universe	If code 2 on Q 303.a		
Literal question	In what month and year did he/she first start living permanently in [country]?		
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a310: Have relationship to somebody without cohabitation			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=4831 /-] [Invalid=10049 /-]		
Definition	Q 306 core questionnaire		
Universe	If R does NOT have a co-resident partner		
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.		
Value	Label	Cases	Percentage
1	yes	1369	28.3%
2	no	3462	71.7%
7	does not know	0	
8	refusal	0

# a316cAgeP: Partner's age at start of permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 10-34] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=50 /-] [Invalid=14830 /-]		
Definition	Derived variable from Q 312.c core questionnaire		
Universe	If code 2 on Q 312.a		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a374cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=622 /-] [Invalid=14258 /-]		
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).		
Universe	If R's partner not born in [country]		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a871AgeR: R's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=12030 /-] [Invalid=2850 /-]		
Definition	Generated from consolidated variables a871m and a871y.		
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed?		

# a871AgeR: R's age at start of current activity status			
	Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" This variable is not available for Belgium.

# a941AgeP: Partner's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1378 /-] [Invalid=13502 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.

# a5122_b: Other's opinion: Parents think R should live separately from parents			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=752 /-] [Invalid=14128 /-]		
Definition	Q 582.b core questionnaire NOR: only country specific values, scale from "2000 -strongly disagree" to "2010-strongly agree".		
Universe	R currently lives with parents/a parent		
Pre-question	Although you may feel that the decision to start living separately from parents is yours, it is likely that others have opinions about what you should do. I'm going to read out some statements about what other people might think about you leaving the parental home during the next three years. Please tell me to what extent you agree or disagree with these statements, choosing your answer from the card. Card 323: Agreement Scale
