No. 87 | April 2023

GGP represented during UN World Data Forum 2023

On April 27 the GGP Central Coordination team took part in the 2023 United Nations World Data Forum (UNWDF) which was held in Hangzhou, Zhejiang province in China.

Fieldwork and Data Officer **Siyang Kong** gave an online presentation titled 'The Generations and Gender Programme: A Global Data Infrastructure for Evidence-based Policies and Decision Making on Demographic Issues in Europe, Asia and South America.'

The aim of the UNWDF is to "spur data innovation, nurture partnerships, mobilize high-level political and financial support for data, and build a pathway to better data for sustainable development". Click [here](#) for more information on the UNWDF.

From Zagreb to the Hague: a visit to NIDI

How can GGS data be used to study child well-being? That is what Dr. **Martina Pezer** came to find out during her research visit to the GGP Central Hub at the Netherlands Interdisciplinary Demographic Institute (NIDI). Pezer is a researcher at the Institute of Public Finance in Zagreb, Croatia, where she has specialized in public sector economics. Her visit was funded through a bursary under the COORDINATE TAV programme.

Pezer: "During my visit I presented my research findings to the GGP team and received insightful feedback on how to refine my work. The GGP team's support and guidance were instrumental in shaping my research. I benefited greatly from exchanging ideas with Prof. Gauthier, the Director of the GGP and a world-renowned expert in family policy research. **As a result of my visit, I have developed an initial outline and prepared do-files for a research paper that compares households with children by breadwinner type and differences in values, opinions, duties, and economic deprivation across selected countries.**"

Fieldwork update

Hong Kong has completed the data collection. In total, 4,266 respondents have completed the web interview (3,935 in Chinese and 331 in English). The unadjusted response rate is around 27%.

The second and main phase of data collection in **the Netherlands** started on April 5 (CAWI, age 18-59). In the first, experimental phase about 500 interviews were completed. For the second phase about 24700 invitations have been sent out as well as one reminder. **So far, 3,737 interviews have been completed in the second phase.**

Croatia will start fieldwork on May 8th. Invitation letters will be sent in 3 batches with approx. 6000 letters in each batch. It will be 100% CAWI mode with an unconditional incentive of 7 euro in cash. Incentives will be sent two days after the invitation letters.

Grooming survey designers in Granada

Mid April members of the **GGP Central Coordination team contributed to the 2023 Comparative Survey Design and Implementation (CSDI) Workshop held in Granada, Spain (April 19-21)**. The team was involved in two sessions jointly organized with partner organizations.

The first session, entitled 'Multiple Interview Modes and Devices to Collect Cross-National Survey Data: Opportunities, Challenges, and Pitfalls', was organized by the GGP team together with the SHARE Berlin Institute (SBI). GGP team's presentations concerned the transition from CAPI to mixed mode and the device use in web surveys in GGS. Two additional presentations were about the SHARE Self-Completion Questionnaire.

The other session was entitled 'Challenges and Solutions in Data Processing, Documentation and Dissemination in the Framework of Two International Comparative Surveys' and it was organized together with the Norwegian Agency for Shared Services in Education and Research called Sikt. It consisted of two presentations about GGP and another one about data documentation of the European Social Survey (ESS). More info about the CSDI workshop can be found on their [website](#).
